

Healthier Turf *and* Happier Players

Now You Can Have Both.

Only the new PerformAire™ aerators from Jacobsen level the delicate balance between quality turf and content customers. The variable-aerators have the versatility to get oxygen down to the deepest roots while providing more productivity and aeration options to lessen course disruption. Core or vent from 1"-16" at up to 98,000 square feet an hour with superior hole quality every time – you can even change depth on the fly! With the new PerformAire 60 & PerformAire 80 from Jacobsen, you no longer have to choose between your players and your turf. For more information, contact your local Jacobsen dealer or call 1.888.922.TURF.
