

With every stroke, they take a swing at your reputation.

Everyone's done it. Hit the ball a little fat leaving a divot the size of a hubcap. Unfortunately, that's just part of the game. But what you should never have to worry about are unsightly white grubs and other destructive insects. That's why Syngenta makes Meridian® insecticide to work both curatively and preventively. Like you, we want to do all we can to prevent anything from spoiling the beauty and enjoyment of the golf experience. We take conditions personally.
