The Midwest Association of Golf Course Superintendents (MAGCS), founded December 24, 1926, is a professional organization whose goals include preservation and dissemination of scientific and practical knowledge pertaining to golf turf maintenance. We endeavor to increase efficiency and economic performance while improving and enhancing the individual and collective prestige of the members.

The MAGCS member is also an environmental steward. We strive to uphold and enhance our surroundings by promoting flora and fauna in every facet in a manner that is beneficial to the general public now and in the future.

# Good Guys

*I recently had a conversation with a former Green Chairman. I have the utmost respect for this individual, not only as a former boss, but also as a friend. He was always level headed and certainly came to understand the nuances not only of the Superintendent's profession, but of the golf industry as a whole. During this conversation he told me about a recent trip to Pebble Beach. He decided to surprise his wife for her 50th birthday, so he, his wife, and another couple played Pebble Beach. The usual was said about how beautiful the course was, and what a great place it was to play, and what a good time they had. But, he also told me about playing at Spyglass Hill. Before his round at Spyglass Hill, he was introduced to the Superintendent there.*

He told the Superintendent at Spyglass Hill about his involvement as a Green Chairman and about some of the events he had attended here in the Chicagoland area. At those events he met other Superintendents. The thing he said during this conversation that really made my day was, "you guys are a bunch of good guys." So you have a former Green Chairman who goes out to Pebble Beach and happens to meet the Superintendent at Spyglass Hill. He has also met numerous Superintendents from the Chicago area, and he believes that we are some pretty good guys.

Now, it's important to understand that this individual is also a very good golfer, carrying a plus one handicap. He has also served on the Board of Directors at the club and numerous committees prior to that. The point here is that he understands the Golf business, and the Club business. He has been around it. You don't get to be a plus one handicap without spending some time in and around a Golf facility. After meeting several individuals in our profession, he seems to have a pretty high opinion of the people. Certainly not everyone thinks of us as a bunch of good guys. Not everyone has that high an opinion of the Superintendent. But the individuals who are in the know, the ones who have been around and take the time to listen, the ones who understand the profession, the ones who are important in a successful Golf operation, do.

---

*The point here is that he understands the Golf business, and the Club business. He has been around it.*

---

Every position within a Golf facility, a Club facility, is important. There is not one part of an operation that could function without the other. Each individual job within that facility needs a dedicated and passionate person, and the Superintendent is no different. We have all made it to where we are today through hard work, commitment, sacrifice, and dedication. At times it may seem as if no one notices. We have all been there. In reality, though, the ones who take the time to listen and to understand, do take notice. **-OC**

# ON THE GREEN, "ALMOST" DOESN'T CUT IT.

Jacobsen® Eclipse® 322: the industry's only  
100% hydraulic-free riding greens mower.

When we say no hydraulics, we mean it. The Jacobsen Eclipse 322 provides greener operations and less maintenance to lower operating costs by up to 86%. Combined with programmable settings and individual reel control, you're assured perfectly manicured greens every single time. **Determine your course savings using our cost calculator at [www.Eclipse322.com](http://www.Eclipse322.com).**

John Ekstrom, Hinsdale Golf Club

# A Trip to Washington D.C.

*Before I begin, I have to thank the MAGCS and Mr. Bob Maibusch. Bob has allowed me to be involved in MAGCS and GCSAA throughout my tenure as his assistant. I want to publicly thank him for his support of my involvement. The MAGCS deserves many thanks as well. Luke Cella and past Boards promoted the Class C position and fostered its growth. Being the Class C Advisor from 2006-07 helped springboard me to opportunities as a writer on the national scene and to being known in Lawrence. So for that, I cannot thank the MAGCS enough.*

It was a privilege and an honor to help represent our industry as a part of the GCSAA contingent that attended National Golf Day in Washington, D.C., on April 13, 2011. I arrived two days earlier, as part of the GCSAA Government Relations Committee. This group was chaired by Pat Finlen, CGCS, and John O'Keefe, CGCS. Chava McKeel, Senior Director of Information and Public Policy, was the staff liaison for our committee. Chava is an amazing resource. If you ever have any issues or questions, DO NOT hesitate to call her. She has connections in Washington and is usually aware of pressing issues at the state level as well.

On the first day, we met at Reed Smith, a law firm that helps GCSAA stay abreast of issues on the Hill. What most interested me was hearing the concerns of the other committee members. Our group included nine Superintendents and one Assistant. The states represented were: Oregon, California, Colorado, New York, New Jersey, Ohio, Maryland, and Illinois. Each member of the group explained some of the issues they face in their respective states. The issues that we have had faced in Illinois over the past ten years are small compared to some of theirs. I was one of the last to speak. I explained that even though Illinois has the third largest city in the U.S., there is quite a bit of agriculture south of I-80 and west of Aurora. I am guessing that helps golf, most of the time.

There are two major issues that most states are facing: either water restrictions or the loss of fungicides in their arsenal. Every year, the pesticide label lists a new state in which it cannot be used. My question is: when will Illinois be added to the knock list?

Bob Ehler, CGCS, MG from Long Island, New York, told the group that there are three aquifers running underneath Long Island. Environmentalists are so tapped in with the legislators and the state EPA that when annual testing is done on the water quality, if any pesticide can be detected at the level of parts per billion, they recommend it be removed from usage in New York. Yes, I said parts per billion; that technology is now available. To me, that is like one drop of water in an Olympic sized swimming pool. Scary stuff.

Later on that day, we heard from Mr. Michael O'Brien from Responsible Industry for a Sound Environment (RISE). Mike is the replacement for Allen James who some of you may recall visited Chicago a few years ago at the turf clinic. Mike told an even scarier story. In the Pacific Northwest a group called the Center for Biological Diversity (CBD) has sued the EPA. They are using the Endangered Species Act to make the EPA look at the impact of 300 different pesticides on 214 endangered species across the country. The scariest thing about this, from what Mike said, is that this group, Center for Biological Diversity, could turn this into a mega lawsuit, which could affect every state and county nationwide. The fallout would be that the EPA and federal government, not having time and funding (mainly funding) to pursue all of these court cases, would settle. In settling with the CBD, I can guarantee that some pesticides would be removed from the market in the U.S. Pretty scary stuff if you ask me.

After the meeting concluded, we walked about eight blocks, going past the White House and the U.S. Treasury

*(continued on page 7)*

"I'll make dollar spot pay."

"Even the best turf can fall victim to disease. But with **Honor® Intrinsic™ brand fungicide**, I won't go down easily. On top of unsurpassed disease control, research shows that **Honor Intrinsic's plant health benefits** give me a better root system so I can stand up to stresses like drought and moisture events, extreme temperatures, and aerification—better than ever."

**Intrinsic brand fungicides** don't just fight disease; they give turf the resilience to endure stress. Find out more by contacting Randy Lusher, 630.810.1832, [randy.lusher@basf.com](mailto:randy.lusher@basf.com).

en route to the hotel. On our walk, just next to the hotel we saw a large, gated home with a guard in front. There were security cameras and a foreign flag out front. Upon entering the hotel, I asked the bellman who lives next door, "Oh that, that's just the Russian ambassador."

Later that evening, we went to the Republican Capital Hill Club for dinner. Many of golf's dignitaries were in attendance. CEOs from all of the major golf organizations were present, along with a contingent of members and staff from each organization. By coincidence, I had the opportunity to sit next to Steve Mona, CEO of the World Golf Foundation and former GCSAA CEO. I had met Steve briefly, once before, but it was nice to speak with him again. The GCSAA group was well represented. Several people told me that the Speaker of the House, John Boehner, was in the building with his security detail having dinner. Unfortunately I did not get to see him. Following a great meal, there were several presentations about what to expect in our Hill visits the next day. David Marin, of The Podesta Group, concluded the evening by giving a sort of pep talk to our group before we left.

After breakfast on April 13th, we all took taxis to the Rayburn Building in the Capital Hill complex. The "We Are Golf" exhibit was there and was already seeing quite a bit of traffic. The PGA had a swing simulator and an indoor virtual golf game in the second floor foyer. Along with that, there were two putting greens. The two greens were the Democrat/Republican challenge. I never did find out who won, but the right was leading before I left. This was an opportunity for legislators, their staff, and anyone walking by to be educated about Golf. My day included four appointments. I had meetings at the offices of Congressman Adam Kinzinger, Congresswoman Judy Biggert, Senator Dick Durbin, and Senator Mark Kirk, all from Illinois, of course. I didn't know what to expect, but Chava McKeel from GCSAA attended my first appointment. We met with the Congressman's legislative aide for economic policy. In our meeting, we explained some of the economic value golf brings to the United States and educated him on some recent legislation that excluded golf.

Here are a few of the highlights:

- Golf is misperceived as solely a rich, white man's game.
- 75% of golf in the U.S. is public
- Golf is a \$75 billion a year industry
- Golf employs over 2 million people in the U.S.
- In Illinois, there are 678 golf courses
- Over \$2 billion dollars are generated for the Illinois economy because of golf
- The IRS considers golf courses to be small businesses, employing people who rely on the game for housing, food, and sustainability.
- In the aftermath of recent natural disasters, Hurricane Katrina/Floods in Iowa, golf was excluded from those disaster relief bills.
- Golf was included with Tattoo/Massage parlors, liquor stores, and gambling establishments, entities not able to get federal disaster relief.

We shared this information with each of the Congressional and Senate staffs we met, and they were amazed.

Following our ten-minute meeting with Congressman Kinzinger's office, Chava and I parted ways so she could make

some phone calls. I made my way to Congresswoman Judy Biggert's office, where I met with her aide for Economic Policy. Sharing some of the same ideas as I had before, this lobbying thing didn't seem too hard. That was put in perspective after my second meeting. I was heading to lunch when I met a lobbyist waiting in line in the cafeteria. He noticed the WE ARE GOLF button on my coat. He asked about our campaign, and then said, "Well at least you aren't some bloodsucker, like me, who represents the banking industry. Everyone likes golf." I can see that his job, especially in these times, is not the easiest.

In the cafeteria, I met a few committee members for lunch. While there I saw some of the PGA contingent and started talking with one gentleman. He asked me how my day was going. I mentioned that I had already met with two legislators and had two more visits to go. Astonished, he asked, "How did you guys set up all of the appointments with the legislators?" I told him that GCSAA works with Reed Smith and that they helped us coordinate all of this. This meant that GCSAA had more individual meetings than any other allied golf organization. That made me feel good.

Also, at lunch in the Rayburn cafeteria, I saw a two-star Air Force General. I had never seen that before. Pretty cool stuff.

The afternoon sessions with Senator Durbin and Senator Kirk's staffs went well. Chava met me to go to Senator Durbin's office as back up. She is very well versed on H.R. 872 – the NPDES permitting bill that would amend the Clean Water Act and FIFRA. It negates the need for the NPDES permits and allows pesticide labels to be overseen by FIFRA and the Clean Water Act. Hence, H.R. 872 is important. That's the message we shared, that and the economic benefits of golf described earlier. The House voted and passed H.R.872 with a bipartisan majority on March 31. Now it will go to the Senate for a vote. Being that Senator Durbin is the #2 man (Whip) in the Senate, behind Senator Harry Reid, I felt having Chava come along was very important. We had a good exchange with Senator Durbin's aide. He was aware of the legislation, but said the Senator hadn't made up his mind on the issue. I hope we helped sway his thinking.

Lastly, Chava left for another meeting and I went to Senator Kirk's office alone. I met with his aide on economic policy and discussed all of the same items that were covered in Senator Durbin's office. These meetings lasted about 10-15 minutes, each.

For me, this was a once in a lifetime event. I flew back to Chicago that evening. After an uneventful flight, which is always good, I lost my iPod on the plane. Aside from being upset about the iPod, I had a wonderful trip. Not only is it always good to spend time with the Board members and staff of GCSAA, but I got to talk with golf's leaders and hear their stories, worries, and hopes. I know it sounds corny but we are all a part of golf. The Family of Golf. If the golf economy is down, it affects all of us. Club managers, pros, the hot dog guy, people selling drivers at Golf Galaxy; all of us. It was great to be part of National Golf Day, especially as an assistant superintendent. An experience I will never forget.

Thank you MAGCS. **-OC**

# THE TORO GREENSMASTER<sup>®</sup> TRIFLEX<sup>™</sup> HYBRID

*Setting the standard  
by which all other  
riding greensmowers  
will be measured.*

## Faster Transport Speed

10mph transport speed allows you to stay ahead of golfers and get more greens cut in a shorter time.

## Lift-Gate Footrest

The footrest flips up for easy access to the center cutting unit.

## Double "A"-Arm Suspension

Maintains full flotation range to prevent gouging or scalping when going over undulations.

## Reel Drive Motors

Available in hydraulic or the **NEW Electric Reel** motor. Each reel motor has a nominal 1½hp that can increase up to 3hp during peak load periods.

## 8, 11 & 14 Blade Reels

Choose the right reel for cutting heights ranging from 1/16" to 1"

## Lift-in-Turn Cutting Units

The suspension system provides a slight lift to the inside of the cutting units during turns to deliver a consistently level cut.

Count on it.

## FEATURE II

Jason Wolf, *Whisper Creek Golf Club*

# Rocky Bunkers?

*After spending countless hours manually removing rocks from Whisper Creek's bunkers, our team thought there had to be a better, less time consuming way.*

Whisper Creek is located 50 miles from Chicago, in the northwest suburb of Huntley, in the Dell Webb active adult community. The course was designed by Billy Casper and Greg H. Nash. It stretches out over 7,000 yards and includes more than 70 bunkers of varying sizes, all in need of constant maintenance.

In the process of researching what was available, I stumbled on a walk-behind sand cleaner commonly used for beach cleaning. This machine is self propelled. It utilizes a vibrating sift screen to process sand and remove rocks and other unwanted debris. It manually lifts and elevates the sand for cleaning. Clean sand falls through the screen, while contaminants move back into the collection hopper. There are three interchangeable screens: 3/16, 3/8, and 9/16."

By using a hand wheel, the depth of cleaning can be adjusted from 0 to 4 inches by the operator, at any time, even when the machine is in use. The unit is eight feet long and easy to maneuver because of an independent wheel brake on each wheel as well as differential assist. An air-cooled 5.5hp gasoline engine powers this machine.

Whisper Creek's 70 bunkers were constructed with Best Tour Grade sand. Bunker size varies from small pot bunkers to fairway bunkers in excess of 8,000 square feet. Over the past ten years, much of the Best Tour Grade sand has blown away and contaminants have become a problem.

We are currently in the process of renovating the bunkers with Morris sand. This unit works great in both the Best Tour Grade and the Morris sand. The problems we have encountered are effectiveness after a heavy irrigation cycle and ability to perform while on an incline. When the machine encounters wet sand, the sand clumps and then clogs the sifting screen. This reduces the effectiveness of debris removal. Any sifting that occurs on an incline or around the bunker faces will dig and tear at the bunker liner. The machine is most effective in the flattest areas of the bunkers.

Overall, we are very pleased with the purchase. Not only does it remove objectionable stones and

rocks, but it also loosens and conditions the sand. The purchase of this unit gives us a more efficient, effective way to clean and groom our bunkers. Use of the unit has been rotated into our maintenance program once a month. It leaves the bunkers more playable and rock free. **-OC**

SUPER -N- SITE  
Josh Cull, *Chicago Golf Club*

## Luke Strojny, CGCS -N- Prairie Bluff Golf Club

*Doing more with less seems to be the mandate for most superintendents these days. The ever-increasing price of fuel is rapidly driving up operating expenses, and the stagnant economy is driving down the availability of funds for general operations. This is somewhat of a conundrum because golfers' expectations for playing conditions are the only constant. This current state of affairs has forced many superintendents to streamline their operations and look for new ways to become more efficient.*

The downturn in the economy may be more difficult for superintendents managing larger budgets generally associated with private facilities; however, superintendents in the public/municipal sector have been maintaining excellent golf courses for decades with significantly smaller budgets. Having met this month's host, I realized this "new" ideology of doing more with less is, in fact, not new at all. Luke Strojny, CGCS is a veteran of the turfgrass industry.

He got his start at age sixteen working for John Lapp and Frank Jemsek at St. Andrews Country Club in West Chicago.

"As a kid working as a caddie, I saw the superintendent (John Lapp) riding around the golf course with his dog and thought to myself that seems like a pretty easy job," Luke told me.

That thought led him to five quick years of tutelage under Lapp, until Luke moved on to become a superintendent at a nine-hole course in Wisconsin. That position predicated a twenty-five year tenure at Poplar Creek Country Club in the northwest suburbs where Strojny mastered the art of providing a championship caliber golf course within a constrained budget. Admittedly, he says his biggest challenge was adjusting to a smaller budget. Four years ago Luke departed from Poplar

*The Prairie Bluff Golf Course Team.  
(L to R) Kevin Bauer (Head Technician), Luke Strojny,  
Kenny Shepherd, Manny Mascote (Assistant Superintendent)  
Luis Guzman (Irrigation Technician)*

Creek and assumed the leading role at Prairie Bluff Golf Course in Lockport, Illinois. Maintaining a championship golf course on a municipal budget, Luke continues to excel in the industry, proving that course conditions do not have to diminish with the budget. When asked about professional accomplishments of which he is most proud, Strojny cites a multitude of in-house capital improvement projects he was able to complete... under budget.

Strojny says his biggest challenge, currently, is following an excellent superintendent and continuing to improve the golf course. He credits the staff around him, including his assistant

Manny Mascote, and his supervisor at the Lockport Township District for all of his successes.

"It is a cohesive and cooperative environment," says Strojny "that has rejuvenated my passion for this business."

Off the golf course, Luke referees an inline hockey league and enjoys thoroughbred racing. When asked what he would do if he were not a golf course superintendent, Luke said he would like to be an NHL referee or possibly get into the horse racing industry as a track superintendent. He has two children: a son, Kyle (19), and a daughter, Julia (14). **-OC**
