

You can't change the climate. That's why we created new chemistry.

There's no controlling the temperature. But with Briskway™ fungicide, you can help control all major summer turf diseases with no heat restrictions. Thanks to a new active ingredient—difenoconazole—Briskway is a cooling DMI containing fungicide that can be used on all turf types, even in the hottest months, with no PGR effects. Combine that with the disease control and plant health benefits of azoxystrobin, and you can keep your turf looking great no matter the climate.
