

You wouldn't use a race car to measure green speed.

With Secure™, you no longer need to use systemic fungicides in place of contact disease protection.

Introducing Secure™ fungicide, a game changing multi-site contact that is the perfect rotation partner to Daconil Action™. Secure is the only registered fungicide for turf in FRAC group 29 and has no known resistance and low risk of future resistance. With Secure, you now have the contacts you need to complete your disease management program. Secure. Your rotation, your way.
