

## WASTEWATER IRRIGATION RESEARCH

(Continued from Page 32)

In addition, donations of time, funds or materials were being provided by the Chicagoland Golf Course Superintendents Association, the Midwest Association of Golf Course Superintendents, and several turfgrass-related businesses in the area. "Such combined efforts," relates Mueller, "guarantee the success of this worthy undertaking geared to the preservation of our ever dwindling fresh water supply."

Mueller continues, "We plan construction of our turf test plots and ornamental shrubs and ground cover test plots in early April, hoping for completion by early June. These plots will be located on property offered to us by the North Shore Sanitary District." Conducting the research will be Dr. Turgeon, with superintendent Jim Johns and the Northmoor Club assuming the maintenance of the plots. Progress reports will be made periodically by the Chicago District Golf Association from research data gathered. It is expected that the entire project will take two or three years, according to Mr. Johns.

"We feel," concluded Mueller, "that this cooperative effort is a significant development in bringing together the CDGA, the Clubs, the superintendents and the University of Illinois into a most ideal relationship. We appreciate and applaud them for their progressive attitude."

The National Golf Foundation adds its commendation to the entire project and its people, and encourages other communities to pursue similar undertakings of research that will reduce turf irrigation expense by utilizing water more efficiently and in a more environmentally desirable manner for everyone concerned.
