

## E. R. STEINIGER MADE HONORARY MEMBER

Eb Steiniger, Superintendent of the world famous Pine Valley Golf Club, Pine Valley, New Jersey, was presented with an Honorary Membership of the South Florida Golf Course Superintendents Association.

President Lou Oxnevad made the formal presentation at the conclusion of a Slide presentation at Doral Country Club.

Eb Steiniger, who has held the position of Superintendent of Pine Valley for over 43 years, presented a color slide game of golf at this world famous course. A hole by hole description evoked gasps and cheers from the audience. Rugged and terrible, beautiful and tranquil, all describe Pine Valley. Started in 1912 and built in the sand wastes of southern New Jersey, the evolution of the character of the trees, shrubs and plant life proved the adage, "The Golf Course Architect may design and build a golf course, but it takes a good Golf Course Superintendent to make it into one."

Eb Steiniger's efforts in Landscaping and subtle changes proved this old adage. He had the pictures, and pictures are proof positive of what one man can do through the years. Eb claims that he has been blessed with many nice things in his lifetime. His blessing at Pine Valley has been that he has had only one President to work with in all those years. John Arthur Brown, who it seemed had a burning desire to make Pine Valley the greatest course in the world, has truly achieved this goal. But, in the opinion of many, know that it would never have happened without Eb Steiniger. In achieving these goals, Eb has greatly enhanced the profession of Golf Course Supt. To acknowledge this fact, the Plaque presented to him by the South Florida Golf Course Superintendents Association reads as follows:

To honor a Golf Course Superintendent  
who has greatly enhanced our  
professional image.
