

**“THE FLORIDA GREEN”
Receives
National Recognition**

In December 1982, The Editorial and Awards Committee of The Golf Course Superintendents' Association announced that our publication had been judged one of the 10 overall best newsletters in The National Association. In addition, “The Florida Green” was judged to be # 1 in cover and editorial content.

Our editor is proud to share the news of this prestigious award with our reporters, photographer and readers. Once again we say “Thank You” to our advertising family for making “The Florida Green” available to our readers.

Jacobsen Introduces...

This extensively redesigned mid-size three-reel riding mower, introduced by DeBra Equipment Co., mows up to 33 acres of turf in one shift. The new Jacobsen Turf King II is available in either 76-in. or 84-in. cutting widths. Low-maintenance fetures include a 14 hp electric-start air-cooled engine, a large air filter with precleaner and a cooler operating hydrostatic transmission. ■
