

IS THIS YOU?

"Thinking I could save time, I rigged up a beam with a pulley at the top of the house, and a rope leading to the ground. I tied an empty barrel on one end of the rope, pulled it to the top of the house, and then fastened the other end of the rope to a tree. Going up to the top of the house, I filled the barrel with bricks. Then I went back down and unfastened the rope to let the barrel down. Unfortunately, the barrel of bricks was now heavier than I, and before I knew what was happening, the barrel jerked me up in the air. I hung onto the rope and halfway up, I met the barrel coming down, receiving a severe blow to the left shoulder.

"I then continued up to the top, banging my head on the beam and jamming my fingers in the pulley.

"When the barrel hit the ground, the bottom burst, spilling the bricks. As I was now heavier than the barrel, I started down at high speed. Halfway down, I met the empty barrel coming up, receiving severe lacerations to my shins. When I hit the ground, I landed on the bricks, receiving several cuts and contusions from the sharp edges of the bricks. At this point, I must have become confused, as I let go of the rope. The barrel came down, striking me on the head, and I woke up in the hospital. I respectfully request sick leave."

WE HELP SOLVE PROBLEMS

with dependable testing and analysis for emergencies and preventative maintenance.

- * Consulting services
- * Soil, plant and water analysis
- * Fast service
