

Plants of the Year

This is the last in the Plants of the Year series for 2005. This may be the last of this series for awhile. The FNGLA is reevaluating the program. The plants selected for this program have been found to be good performers in the Florida environment and require less maintenance and inputs. Here are two specimens for your consideration.

Common name: East Indian Holly Fern
Botanical name: *Arachniodes simplicior variegata*
Hardiness: Zones 7-10
Mature height and spread: 18-24 x 16-20
Classification: Ground cover masses in part shade to shade
Landscape use: The East Indian Holly Fern features evergreen leaves with yellow variegation along the midribs. It makes a good cut for floral arrangements and is best in light shade of trees, but is able to take sun if well watered.

Common name: Weeping Yaupon Holly
Botanical name: *Ilex vomitoria 'Pendula'*
Hardiness: Zones 7-9
Mature height and spread: 20-30 x 10-15
Classification: Multi-trunked tree
Landscape use: Striking accent plant
Characteristics: The Weeping Yaupon Holly features small, white flowers that blossom in the spring and red berries that appear in the fall and winter. Drooping branches give a narrow profile and a distinctive appearance to this evergreen tree. It is an excellent wildlife plant, native to Florida and is disease- and insect-free taking full sun or shade.

Computer-Exact Custom Mixes. Every Order. Every Time.

- All Loads Scaled
- Soil Analysis Available

- Next Day Service
- Volume Orders
