

UMAXX® PUTS YOU IN CONTROL

Take control of your nitrogen program. Make your own long lasting nitrogen for spray applications in house. Turf professionals looking to maximize their fertility programs turn to UMAXX because it improves nitrogen efficiency, increases plant utilization and minimizes environmental loss. UMAXX does not rely on temperature, moisture or microbial activity for release, keeping you in control of your nitrogen program and performance. UMAXX stays in the available ammonium form ready for the plant to take it up as it needs it. This stabilized form reduces nitrogen loss by volatilization, leaching and denitrification making it a nitrogen management tool for those geographies with water quality guidelines. In addition, this means reduced grass clippings, maximum visual color and an environmentally responsible product.

UMAXX stabilized nitrogen is conveniently packaged in 50 pound bags designed for soluble nitrogen programs. Applicators pour UMAXX into the spray tank strainer cavity while water is filled. It readily melts into solution and does not settle out. It can be mixed with other plant nutrients, fungicides, growth regulators or insecticides. UMAXX can also be added to your fertigation tank.

STEVE KRASK
Regional Manager
AGROTAIN International

Whether you are making liquid or granular applications, UMAXX is the only nitrogen product you will need. Year round, it delivers attributes of quick & slow release nitrogen in one product. Take control of your nitrogen program and get started today.
