LESCO Oregreen Intermediate Ryegrass	Tees & Collars Fairways	20 - 25 lbs/1000 sq. ft. 250 - 300 lbs/acre

Fungicide seed treatment is available on all of the above certified ryegrass mixtures. The genetic integrity of the above products is assured by being shipped as certified blue tag mixtures under the Oregon State University Certification Program. These blends and mixtures are designed to produce top quality overseeded turf with improved disease resistance and wearability.

<sup>1</sup>Shadow Chewings fescue is a new, moderately dark green variety with improved disease resistance, heat and shade tolerance. Shadow has very good resistance to powdery mildew.

<sup>2</sup>Oregreen Intermediate Ryegrass is a new variety derived from a cross between Manhattan perennial ryegrass and a low growing annual ryegrass. It has a turf-type growth habit and better disease resistance and cold tolerance than common annual ryegrass.
