research and testing in ryegrass bermudagrass overseeding.

"We used CBS on greens, tees and clubhouse lawns. We are impressed with the fine texture of grass blades which allows a true roll of the ball. CBS also maintained excellent color through the coldest winter in years.

*Cary Stoffel, Superintendent  
Carolina Shores Country Club  
North Myrtle Beach, SC*

"Oregreen established quickly and densely on our fairways and gave deep green color. Our winter has averaged 12 to 14 degrees below normal. In spite of six inches of snow and an inch and a half of ice, Oregreen maintained good cover on our fairways. Our annual rye was weak, thin and off color."

"CBS Blend had great recuperative features and came through a very difficult season with extreme temperatures. I feel CBS Blend maintained a standard high above other blends used. CBS Blend provided a quality putting surface and was cut at 15/64" here when temperature reached into the upper 80s for extended periods. CBS was maintained at 17/64" and provided us with a quality putting surface. The mowing quality of CBS was far superior to other blends we had used in the past."

*Neil Kalin, Superintendent  
Pembroke Lakes Golf Club  
Pembroke Pines, FL*
