

Pinehurst Country Club, N.C., uses CBS BRAND Perennial Ryegrass on greens, tees and fairways.

Plot testing at Pinehurst Country Club proved CBS was the best ryegrass blend to oversee all the tees, greens and fairways at this 108 hole golf complex. Citation, Birdie and Omega turf-type perennial rye-grasses provided this course with a dark green, durable playing surface.

Lee Dalton Superintendent

CBS gave us quick germination that produced dense growth with excellent color. It also showed good winter hardiness during wet and dry periods.

Wayne Maples Superintendent

Excellent quality, fast germinating. Very good wear tolerance and excellent disease resistance. Overall, I would highly recommend this seed blend.

Lewis Metts Superintendent

CBS impressed me with its excellent winter color, its ability to recover from damage and its quickness to establish after rapid germination.
