

Introducing **LESCO** **ELITE**

From LESCO, the company that listens and responds to customer needs, comes a complete new line of small-particle sulfur-coated urea fertilizers.

Specifically designed for low-cut turf, the new ELITE fertilizers from LESCO provide many more particles per square foot than coarser-grade products that can cause speckling. That means consistent greening and a more uniform distribution pattern. In addition, the slow-release feeding provided by the sulfur-coated urea insures steady growth and long residual.

Shown is a half-gram each of granular sulfur-coated urea fertilizer (-6/+16) and LESCO ELITE sulfur-coated urea fertilizer.

The chance of mower pickup is virtually eliminated with the new LESCO ELITE fertilizers.

The chance of mower pickup is virtually eliminated with ELITE fertilizers because the new small particles readily filter into the turf.

And because LESCO manufactures its new ELITE fertilizers using sulfate of potash, there's more plant-available sulfur and low potential for burn.

The fertilizer you've been waiting for is available now in six analyses: 21-0-16, 19-0-19, 15-0-30, 12-24-14, 21-4-12 and 31-0-0.

LESCO ELITE is available now in a variety of analyses.

To order the ELITE fertilizer that best fits your needs, call us toll free today.
