

The preemergence you want with the fertilizer your turf needs.

The reputation of Ronstar speaks for itself. On golf courses, it's the leading pre-emergence for control of goosegrass, crabgrass, *Poa annua* and other weeds.

Introducing LESCO 5-10-17 Mini with 0.95% Ronstar.®

But until now, no product combined the effectiveness of Ronstar with a mini-particle-size fertilizer specifically formulated for spring application. LESCO 5-10-17 Mini with 0.95% Ronstar changes all that.

With an analysis that's low on nitrogen and high on phosphorus and potassium, this new mini-particle-size product makes roots, stolons and rhizomes thrive by giving dormant or non-dormant turf a complete feeding that's perfect for spring application. This analysis promotes aggressive spring greenup and regrowth that make you and the course look good.

The pre-emergence you want combined with the fertilizer your turf needs is in stock now. Order today and take

advantage of the generous terms and discounts offered during the LESCO Early-Order Program.

And if Ronstar is not your first choice for preemergent weed control, ask about LESCO PRE-M® 60 DG Herbicide and Lescosan 4E, two excellent alternatives.

To order, contact your LESCO sales representative or call (800) 825-3726 toll free.
