

That's spring dead spot you see. Before now, there was no proven way to keep it from spoiling your Bermudagrass turf. But now there's Rubigan. Rubigan is labeled to control spring dead spot.

For optimum control, apply Rubigan A.S. at 4.0 oz./1,000 square feet for season-long, spring dead spot control. Or if you miss the September application, apply Rubigan A.S. at 6.0 oz./1,000 square feet in October or November.

So before spring dead spot spoils your Bermudagrass turf, put yourself in control with Rubigan. Talk with your Elanco distributor for details. Or call toll-free: **1-800-352-6776**.
