

What's a real double cut?

Turf management tip gleaned from the Internet may help attain specific green speed

Editor's Note: As a superintendent who tended to use a cross-cut pattern on a double cut, this was an interesting tidbit I thought might be worth sharing for folks trying to attain specific greens speeds for special events. This discussion came from Turfnet Associates, Inc. which has a monthly newsletter and a web site. I have consistently found interesting information and wide-ranging discussions in the newsletter. I'm just now accessing the web site. In this information age, a subscription to Turfnet may be worth your while. Contact: Peter L. McCormick, Editor, 21 Brandywine Rd, Skillman, NJ, 08558 or call 1-800-314-7929.

Chuck Murray, CGCS, Edgewood Country Club, Charleston, W.Va. asks: "Running the risk of covering real old ground, I can't remember ever hearing

anything about the mowing direction when double-cutting greens or rolling greens after mowing.

"In order to negate the 3- to 6-inch difference in Stimp readings down a light stripe versus a dark stripe, we began reverse rolling down the same stripe the mower traveled, but in the opposite direction. Same with double cutting... down the dark stripe removes more leaf, also, than "cross cutting" and more closely equalizes the roll down the light and dark stripes. Is this the common practice with triplex mowing?"

Jeff Michel, CGCS, Mount Vernon CC, Alexandria, Va. replied: "Wow! You think it's old ground, but I've been at this 14 years and never even thought about reverse mowing on a double cut. We have always used perpendicular directions. You stated that the reverse cut

picks up more clippings — how does the reverse roll affect the roll of the ball? This calls for some experimentation on my part!"

Murray fired back: "Jeff, the idea came to me when we purchased our Tri-Rollers for the greens mower back in 1994 and did a lot of Stimp readings to determine for ourselves what benefit we were experiencing. In that process, we found that the rolling could be as much as 6-inch difference on the light stripe versus the dark stripe. Thus, we began to "reverse roll" down the dark stripe and brought that differential down to 2" - 3".

Following that, we found that "reverse mowing" when double cutting "harvested" more crop and reduced the grain. Our greens are predominately Pennncross."

GCSAA + FGCSA + FTGA = POWER

BY RICK TATUM, GCS
The Forest Golf Club

GCSAA, FGCSA and the FTGA. Each of these Associations has its strengths and weaknesses.

The GCSAA is our national association that is strong in numbers of members and money. This association has come a long way in promoting our profession to a higher level.

I applaud the work that these volunteers have contributed to make our industry what it is today. My job is better in many ways due to their efforts.

The GCSAA also has a weakness which is in handling local and state-wide issues. Please do not get me wrong: we have made great strides in

having the GCSAA help with these issues and I am sure we will improve in these areas, but it is a national organization which is mostly concerned with the big picture.

The FGCSA is our state association which also is strong in numbers of members. We use the association to attack local and state issues concerning the golf course superintendent.

I also applaud these volunteers that have donated their time and effort to make my job one of the best in our industry.

The FGCSA does a wonderful job in funding educational seminars to make me a better golf course superintendent. Also, the funding that is used to fight statewide issues has elevated our position in the golf industry.

Support the people who are supporting you.

The weakness I feel the FGCSA might have is that the turf industry is bigger than just golf courses. We need to support the turf industry as a whole. This includes the FTGA.

The FTGA awarded over \$635,000 for turf research in the past six years. I know that all this research is not solely directed at golf courses, but we reap the benefit of 80 percent of this research. The FTGA has an annual conference and show which is set up mostly for the benefit of golf course superintendents.

The FTGA is working with the University of Florida to hire a turf coordinator who has a strong background in golf course turf. There are many reasons why we should support the FTGA, but the biggest would be we are stronger together than we are apart.

Last year the GCSAA summoned the state chapters to put in new bylaws. In order to be a member of your state chapter you also had to be a member of the GCSAA. I felt this was a good idea. Support the people who are supporting you. Well, the FTGA is working hard to improve the turf industry in this state, I feel we should work harder at supporting the FTGA. Remember, we are stronger together than apart.

GCSAA + FGCSA + FTGA = POWER!

Call for Articles

This is a call for articles for the 1998 issues of the *Florida Green*.

Contact Joel D. Jackson, Editor for more information. Phone: 407-248-1971. Fax: 407-248-1971. E-mail: FLGrn@aol.com. All slides and photographs should include identification of persons in the picture and the name of the photographer.

HANDS ON TOPICS for 1998: Share your best practices and tips for these upcoming topics. Slides or photographs are encouraged.

- Summer Issue - Selling Your Budget to the Board.
- Fall Issue - Managing Overseeded Greens Through "The Season."

SPOTLIGHT: People and events making news in Florida. From award

winners to chapter tournaments and other accomplishments. Send in your story. Slides or photographs encouraged.

SUPERINTENDENT'S JOURNAL:

Personal observations or experiences related to any phase of the turf management profession. Slides or photographs encouraged.

PROFESSIONAL DEVELOPMENT:

General management topics beyond turf. Examples: Education, facilities, personnel, computers, training, etc. Slides or photographs encouraged.

INDUSTRY NEWS: News items of interest to Florida superintendents from allied associations in the turf/horticulture industry. Slides

or photographs encouraged.

OPINION: Exactly what it means! Articles voicing a personal point of view on any topic concerning Florida superintendents. Slides or photographs encouraged.

RESEARCH: A section reserved primarily for university and technical authors to report on research results within the turf industry. Slides or photographs encouraged.

RUB OF THE GREEN: Articles and anecdotes with a humorous twist. Slides or photographs encouraged.

STEWARDSHIP: Superintendents are invited to submit ideas and articles about environmental issues and initiatives at their courses. Slides or photographs encouraged.

Can we be satisfied being the major stockholder in a company we don't own? I see no alternative...

Congratulations to new Director of Communications, Joel Jackson! The Florida GCSA created this position at the Winter Board meeting and promptly hired Joel to fill it. I can think of no one more

qualified to assume the responsibilities that will elevate our association to new heights of prestige and effectiveness. Joel brings invaluable and unequalled experience, insight and dedication to this position, and we're lucky to have him.

On that same day, the executive boards of both the FGCSA and FTGA met to

improve communications, clear up misunderstandings and chart a course for the future. I think we accomplished quite a bit, but as always, time constraints left a lot of loose ends. Procedures were implemented to keep everyone better informed so the two associations don't work at cross purposes.

There are those who have some times tried to characterize any discord between the two associations as an us-against-them conflict. Such depictions are absurd, given the numbers of superintendents involved with FTGA. Superintendents or ex-superintendents make up 100 percent of the current FTGA Executive Board and about 50 percent of the Board of Directors.

It is frustrating to have other turfgrass professionals regard FTGA as "just another golf association," at the same time that some superintendents consider any FTGA initiative

not directed specifically at superintendents as unimportant or unnecessary. Disagreements about policy, priorities and direction are to be expected in a state as large and diverse as Florida.

My respect and admiration for any superintendent sacrificing his or her time and effort on behalf of their profession by serving on a board is not diminished because we disagree on an issue.

One of the benefits of having two strong associations like FGCSA and FTGA in the same state is that a greater number of people are able to get involved and contribute to our industry. We just need to communicate better and develop a shared philosophy, while better defining the role each association should play in the development of our profession.

As a past president of FGCSA and a current officer of FTGA involved with one or both organizations for nearly 20 years running, I am guided by the following basic convictions, no matter which organization's hat I'm wearing on a particular day:

1) Florida has a unique environment and most applied and some basic research need to be done in Florida to have validity to our situation.

2) The highly regarded university turfgrass programs in the country all have one thing in common - a strong turfgrass association working closely with a university.

3) The larger and more diverse an organization, the stronger the organization.

Adhering to these principles, I get concerned when either the FTGA or FGCSA Board or a local chapter takes action that moves us in another direction. As superintendents, we operate at a faster pace and under greater pressure than the university system or turfgrass professionals in non-golf related activities, making it

Building Bridges

Mark My Words

Mark Jarrell, CGCS
Assistant Editor

extremely frustrating when we must wait for things to happen, like the of hiring a turf coordinator at the University of Florida.

This should not discourage or dissuade us from continuing to work on the foundations, networks and bridges necessary to achieve our long range goals of having: the strongest and most influential superintendent's association; the largest and best funded turfgrass association and the most respected and productive university turf program in the country.

These may seem like lofty — or even unattainable — goals, but all one has to do is consider the size and scope of the golf and turf industry in Florida to realize that the potential is here to

accomplish all this and more.

Superintendents can't do it all on their own, but we have the drive and the talent to spearhead the effort. As Joe O'Brien of GCSAA put it when trying to analyze the FGCSA's relationship with the FTGA, "Can we be satisfied being the major stockholder in a company we don't own?"

I see no alternative if we're going to continue growing and moving forward. Let's not kid ourselves about where the money comes from for financing our current efforts, or future endeavors. Building bridges and forging alliances with other golf and turf interests and organizations is crucial for our future growth and success.

BACK ISSUE SEARCH

Still looking for a copy of the April 1974 Florida Green! Dan Jones, editor emeritus of the *Florida Green*, has passed along to me an almost complete collection of issues! We are missing one issue, April 1974. If any of you packrats out there have a copy, please send it to me. I would like to have the complete collection bound in hard back covers to preserve the magazine's history.

Duststorms Got Members Trading Carts For Camels?

After you've done everything else right, why take short-cuts on course maintenance with ag-grade fertilizers? Sunniland's custom blends are formulated specifically for your course. Uniformly granular, too, eliminating hazardous dust on the course, your equipment, pools and members! The course will look superb and so will you. We knew you wouldn't mind if we cleared the air on course maintenance, so phone our Sunniland Golf Products Representative today.

*Farewell happy fields. Where joy forever dwells:
Hail horrors, hail Infernal world, and thou
profoundest Hell. Receive thy new possessor: one
who brings a mind not to be changed by place or
time. The mind is its own place, and in itself can
make a Heav'n of Hell, a Hell of Heav'n.*

John Milton from Paradise Lost

Tired of hearing about El Nino causing every problem except hair loss and bad breath? Me too. There have been a lot of lost paradises and unhappy fields this past winter as golf courses fell prey to marginal growing conditions overcast skies and record rainfall.

The good news is... February has been sunnier and drier in most areas of the state. **The bad news is...** wetter than normal conditions are forecast for spring, but who has been able to predict the weather lately? A record cold spell in March! Man it's tough trying to keep a golf

course looking perfect under these roller coaster conditions.

The good news is... we received a lot of information from the GCSAA, the USGA Green Section and the University of Florida to help explain the effects of these abnormal conditions on turf quality. **The bad news is...** some club officials take one glance at the facts and toss them aside calling them excuses instead of explanations. You can lead a person to the facts, but you can't make them think.

The good news is... some concerned golfers learned more about our business because of this situation. **The bad news is...** more superintendents will be put through unnecessary hell by shortsighted and hardheaded people who still "demand" instead of "understand."

The good news is... course conditions will improve with better weather. **The bad news is...** well usually there is no bad news for good weather conditions, unless it doesn't happen fast

enough for those impatient souls who expect perfection in everything and everyone except themselves.

There's more good and bad news than just the weather and its complications.

The bad news is... EPA is trying to take some short cuts in reviewing pesticides under the Food Quality Protection Act. That could lead to premature removal of uses from product labels. **The good news is...** manufacturers and end users are uniting in a grass roots campaign to keep Congress informed of the facts. Letter writing voters have influence.

There's also bad news looming for MSMA users as EPA and DEP get gung-ho about arsenic levels on golf courses. **The good news is...** naturally occurring background arsenic levels (it is a natural element, you know) are often higher than what EPA wants to legislate. Now that would be a neat trick if they can pull that one off.

Be assured there will lots of discussion on this issue before it's over. In the meantime watch what you do around your mix and load sites, folks. That's where samples keep coming back positive.

And perhaps the best good news is... the University of Florida has finally found a turf coordinator for IFAS. After two years of sifting through applications and resumes and conducting interviews, and then having to re-group after the first search process came up empty, the university named Dr. John Cisar from the IFAS Research and Education Center in Fort Lauderdale to head the turf program.

Dr. Cisar has probably been one of the most prolific researchers on turf-related projects in the state in recent years, focusing on the impacts of turf management procedures on the environment with lots of positive results for our industry.

You won't hear any bad news from me on this decision. The only negative was that the process took too long, but now that's old news not bad news. Good luck, Doc! We're with you 100 percent even if IFAS can't do anything about the weather.

After all this if your golfers still complain, just tell them I said, "To 'El' with it!"

'Hell' Niño and other Good News - Bad News

Green Side Up

SOMEWHERE THIS YEAR A SUPERINTENDENT PLANTED THE ONE MILLIONTH POUND OF CYPRESS POA TRIVIALIS!

That's right, in an unprecedented time span of only 4 years, certified Cypress Poa trivialis has taken the market by storm. Superintendents from Las Vegas, Palm Springs, Phoenix and across the sunbelt states are using certified Cypress in record numbers.

University tested for years at such prestigious turf trials as the University of Florida, the University of Arizona and Mississippi State University. Certified Cypress keeps coming up first in establishment, color, putting speed and quality. When mixed with

creeping bentgrass or perennial ryegrass, exceptional greens and fairways are the result. What more could you ask for?

For excellent transitional qualities, specify Certified Cypress.
