

Syngenta never stops working to keep your course green.

Sure, we have an unmatched portfolio of products. From Subdue MAXX™, the industry leader against Pythium, to Barricade®, the longest-lasting pre-emergent against crabgrass. But we're never content. Keeping turf healthy means constantly refining our formulations. And developing new ones, to ensure we always have the best products. Making sure you have the tools you need, that's what we do.

did I believe that his strength and determination, and modern medical science, wouldn't be enough to get him back on the golf course playing, designing, or sharing his vast knowledge of the game and profession he loved.

Joe's strength was quiet and unassuming - running silent and deep like the German submarines he monitored in the Mediterranean during World War II. His integrity and serene nature won over all but the most obnoxious of egos. He was like the eye of a hurricane during the heated discussions that often took place during the planning or implementation of one of his projects.

Joe used to say that one of the things he liked best about golf was the quality of the people who were involved with it. In my humble opinion, he is the gold standard against which all others are measured. He leaves a remarkable record of professional achievement, but he leaves an even more astonishing record of lives influenced. He was my hero, and I shall miss him, but his influence was such that he will always be with me.

While always smiling and upbeat, one comment 13 days before his passing revealed just how weary he was of the unremitting struggle to just draw breath and do the day-to-day activities we all take for granted. He told Mr. Robert E. Rich, his best friend and owner of Palm Beach National, "Bob, I can't even walk around this table without getting tired and out of breath. That's no way to live. If we can't figure out what's wrong, then... I don't know."

I think Joe had finally had enough, picking his ball up and putting it in his pocket, not because the bunkers were too deep or the rough too long, but because it had just gotten too dark to continue play. If there are golf courses in heaven, as all who play the game want to believe, then Joe Lee has replaced Donald Ross as Senior Designer, and is currently remodeling The Links of Paradise.

Editor's Note: The book, "Gentleman Joe Lee - 50 Years of Golf Design" by Ron Whitten, is not for sale in book stores. It may be obtained from the Joe Lee Scholarship Foundation, P. O. Box 1270, Boynton Beach, FL, 33425. A \$50 donation to the scholarship fund is suggested.

2002 Photo Contest Results

This is part 4 of presenting the 4 category winners of the 2002 photo contest.

Category 3 - Native Areas: includes native plants including trees, shrubs and grasses used in naturalized areas and aquatic vegetation plantings to create habitat and protect water quality.

First Place - "Florida Cactus" Jason DiMartino, Audubon C.C., Naples.

Second Place - "Cypress and Palms" by Tom Biggy, Bent Tree C. C., Sarasota.

2003 Photo Contest Rules

Category 1 - Wildlife on the course: includes any critter on the course that walks, flies, swims, slithers or crawls.

Category 2 - Formal Landscaping: includes annuals and ornamental shrubs and trees planted in formal beds on the course or club entrance.

Category 3 - Native Areas: includes beds of native plants including trees, shrubs and grasses used in naturalized areas to reduce turf inputs and aquatic vegetation plantings used to create habitat and protect water quality.

Category 4 - Scenic Hole: includes any view of a golf hole (panoramic or close up) that demonstrates the scenic beauty of a golf course.

Easy Rules

1. Color prints or slides. Prefer prints. Only one entry per category. There are too many variables affecting publication quality to permit digital entries at this time.

2. Photo must be taken on an FGCSA member's course. Photo must be taken by an FGCSA member or a member of his staff.

3. Attach a label on the back of the print or slide which identifies the category, course and photographer. **DO NOT WRITE DIRECTLY ON THE BACK OF THE PRINT.** Each print shall be attached to an 8.5" x 11" sheet of paper using a loop of masking tape on the back of the print. Slides should be in plastic sleeves for easy access for viewing.

4. A caption identifying the category, course and photographer should be typed or printed on the sheet of paper below the mounted print.

5. Judging will be done by a panel of FGCSA members not participating in the contest.

6. Mail entries in a bend-proof package marked "PHOTOS. DO NOT BEND" to Joel Jackson, 6780 Tamarind Circle, Orlando, 32819. Entries postmarked after August 1, 2003 will be automatically entered in the 2004 Photo Contest.

First Place

"Florida Cactus"

Jason DiMartino

Audubon C.C., Naples.

Second Place

"Cypress and Palms"

Tom Biggy

Bent Tree C. C.

Sarasota.

Operation Mountain Lake

By Joel Jackson, CGCS

This is Joel Jackson aboard a beer-laden Club Car reporting live from Lake Wales. I am imbedded with the Ridge

Green Side Up

Runners detachment of the Ridge Chapter Coalition as they make their way up Alt. 17 to occupy the Mountain Lake Golf Course. I was asked to fill in for Geraldo Rivera who was forced to leave

Polk County after revealing how many cases of beer had been purchased for the Ridge golf outing.

This first-ever media eyewitness report on the actual implementation of the notorious and infamous "Ridge Rules" in action is not recommended reading for dues-paying members of the USGA or their staff members. In fact, USGA Green Section Agronomist Todd Lowe left immediately after lunch before the first tee shot was struck. When I inquired why he was leaving in such haste, "Don't ask. Don't tell," he shouted as he ran to his car.

To give you a sense of the clear and present danger of a Ridge Runner golf outing, the game being played that day was "Best Two Net Scores" of each foursome. Our foursome contained five people, a fact that seemed to escape team captain Bobby "RPG" Ellis. The RPG stands for "Ridge Putt Gimme." The other members of our "foursome" were in order of rank: Alan "MOAS" Puckett - MOAS means "Mother of All Slices"; Tom "Bunker Buster" Barnett; Billy "Stealth Bomber" Card and me, "Three Putt" Jackson.

Captain Ellis gave early indications of how the Ridge Rules are used to alter the normally accept-

Ridge sand wedge. Photo by Joel Jackson

ed Geneva Convention Rules of Civilized Golf when he hit two or three tee shots on the first hole until he kept one in play. When I asked about the fairly obvious violation, he merely said he was invoking the "Multiple Mulligan" section of the Ridge Rules. Since both Ellis and Puckett are past presidents of the Ridge GCSA, I learned they are entitled to "Double Secret" rule bending.

On the second hole, when Ellis hooked his ball out of bounds, I asked if he wanted to reload. He said, "That ball is playable. Ridge Rules define out-of-bounds as a ball hit out of Polk County." Another rule he invoked often, which led to his nickname, was the "RPG" or Ridge Putt Gimme. RPGs ranged from 6 inches to 6 feet depending on his score needed on a particular hole. He never scored less than net par on a hole.

"MOAS" Puckett was devastating on the tee box. He would take dead aim left and a big divot (read crater) after firing his 580mm TaylorMade Cannon on a trajectory that looked a lot like a drunken Australian throwing a boomerang. Only once did the ball and his divots fail to make it to the fairway and that was on our last hole. Puckett proceeded to demolish two 80-year-old oak trees and two fairway bunkers with four mighty whacks plus his tee shot enroute to the front approach of the green and promptly got up and down with a three-putt for a Ridge Five. You do the math.

One of the most prodigious displays of high-tech ordinance came from my cart partner "Bunker Buster" Barnett. Using a laser-guided driver and fully automatic 7-wood, Barnett displayed the uncanny accuracy of his clubs by hitting a fairway and greenside bunker on every hole. Even though the bunkers had recently been fortified by architect Brian

Silva, he destroyed them easily. Captain Ellis showed me how to conquer them by using the patented Ridge Sand Wedge. See the accompanying photo. This club makes Peter Kessler's Perfect Club obsolete.

Billy "Stealth Bomber" Card had the most accurate artillery and constantly bracketed the middle of the fairways 300 yards down-range. If the other players chlidipped a drive or hit it so far off line that it would require too much time and effort to get back in play, we simply played scramble format and dropped within in club length of Card's ball. Ellis assured me this was entirely legal since it kept up the pace of play, which was vitally important to our coalition's timetable, since happy hour was going to be on an abbreviated timeline.

Puckett and Ellis also employed various diversionary tactics like dialing up each others cell phones to ring in the middle of a competitor's backswing. When it was impossible to get the timing down on the phones, they would simply talk, tell jokes and laugh just loud enough to be heard. Another effective tactic was to place numerous empty beer bottles in the dash compartments of the golf cart and swerve down the fairway at high speeds to creating distracting clanking sounds.

At the end of the day, after all that effort to shape and manage the rub of the green in our favor, we each ended up paying five bucks to the real golfers - "Wolfman" Hopkins and Scooter Scamehorn and another golfer whose name is classified (he does the Ridge wet work - code name, Water Hazard). Their "foursome" only had three people. Hey, Ridge Rules.

This is Joel Jackson reporting for Florida Green News from somewhere near Lake Wales.

Compare test results of proven overseeding grasses and you'll notice similarities. V.I.P. 3 Turf Type Perennial Blend is a combination of quality and performance...and at an amazingly affordable price. Contains #1 ranked varieties. Available in specific overseeding formulations. Varieties chosen for outstanding ease of transitioning, and genetic dark green color. Contains endophytes.

PIZZAZZ promises to set the standard for the next decade. Its dark green color and dense turf make it an attractive choice for parks, home lawns and golf courses. Clonal selections contained high levels of endophytes, and this synthetic variety is lower growing than many older varieties.

Paragon is in a class all of its own. In fact, we are so certain that you will want Paragon in your turf program because of its superior turf qualities, we have taken measures to ensure that once you see Paragon for yourselves that you will be able to readily get seed for this coming fall season. It's that good. Better color, finer texture, improved disease resistance. Paragon - the professionals choice.

Private and university trials have shown Cypress to be a premier overseeding grass. Cypress Poa trivialis establishes fast and can be cut close immediately, even after overseeding. As your Bermudagrass goes dormant, Cypress will provide the finest dark green putting surface with no interruption in play. Cypress is tolerant to shade and damp soils. This unique prostrate growing variety thrives in cool weather and will survive cold weather that will damage Turf Type Ryegrasses. But most important, Cypress will maintain its dark green color all winter long. As the weather turns hot in the spring, Cypress will die out naturally as your Bermudagrass begins to grow. Cypress will not choke out your Bermudagrass in the spring as some heat tolerant Perennial Ryegrasses do.

TMI has spent years developing StarDust to be more disease resistant and is one of the darkest commercial Poa trivs for better color matches with some of today's darkest green ryegrasses. University overseeding trials in Florida and Arizona have shown StarDust is setting the next standard that other Poa trivs can only hope to achieve!

Created to meet the specific needs for seeding athletic fields, lawns, and golf courses. Establishes quickly and performs well under moderate to low fertility. Barracuda will grow under a greater variety of conditions than other grass seed, even on soils very poor in lime. Barracuda is a perennial grass with a creeping habit of growth, darker green than common redtop. Drought tolerant, dense turf with excellent mowing qualities.
