

What is the industry's first hybrid greens mower missing?

Only 102 potential leak points.

Introducing the run-all-day, 2500E Hybrid Tri-Plex Greens Mower\*. As the industry's first hybrid greens mower, our new 2500E Tri-Plex is more than just an electric mower. It operates on a traditional engine that drives an alternator which powers electric reel motors to drive the cutting units. This industry-exclusive design eliminates more than 90% of the most likely leak points while also reducing sound levels and increasing fuel efficiency. And because the 2500E is not dependent on battery power for run time, it can keep the same frequency of clip on every green.

To see the difference a 2500E can make on your course's greens, call your local John Deere One Source distributor. [www.JohnDeere.com](http://www.JohnDeere.com)

\*Product available March 2005.
