

A great start to
a smooth finish.

Putting weight in all the right places. That's the essence of the John Deere C Series Walk-Behinds, mowing machines with proper weight distribution and balance. Being fixed-head mowers, the C Series walk-behinds stay engaged with the turf and always cut at a consistent height. They also feature a narrow front roller to rear drum distance for easy turning, maneuverability and clean-up cutting performance. And a dual-traction drive makes for even straighter tracking on greens.

For the consistent cut your greens deserve, call your local John Deere Golf distributor today.
