

By the time you read this,
your height-of-cut could
have been adjusted.

New Quick Adjust Reels. Yes it's now this easy to adjust the height-of-cut. Just click in a power drill on either side of the cutting unit, hit the trigger, watch the gauge, and you're done. No wrenches, and no need to double-check both sides. Thanks to SpeedLink technology, they match perfectly every time. But don't just read about these reels. See them for yourself. Call your John Deere Golf distributor for a demo. **Consider us part of your crew.**
