

Bunton offers new 12.5 horsepower engine

Bunton Co. is offering the new 12.5-horsepower Onan engine on its 61-, 52-, 48-, 36- and 32-inch heavy-duty commercial mowers.

The technically advanced design of the Onan engine features overhead valve technology that provides mower power and better fuel economy.

Bunton says hillside mowing performance is improved with a positive-displacement oil pump that provides full pressure lubrication for longer bearing life.

The Onan 12.5-horsepower engine is also

available through Bunton dealers as a replacement engine for other mowers.

For more information contact Bunton Co. P.O. Box 33247, Louisville Ky.; telephone (502) 966-0550. **Circle No 195**

Kubota unveils new G-Series tractors

Kubota feels it has set a new standard of grass cutting with its new G-Series tractors. All three models - the G1800, G1900 and G2000 - come with standard steering or new four-wheel steering (4WS) system.

This feature allows for smoother, tighter turning than a conventional garden tractor and is ideal for mowing around trees and obstacles. An uncut circle of just 1.6 feet in diameter is made possible by the 4WS.

Both the G1800 and G1900 are equipped with liquid-cooled diesel engine, providing 16 and 18 horsepower, respectively.

These new models offer improved durability and maneuverability and feature a semi-flat operator's deck for comfortable

operation. Hydrostatic transmission is standard.

For mowing in open areas or long distances, the G-Series models offer "cruise control." The operator presses the HST foot pedal, adjusts speed with the speed set lever and steers without using the foot pedal.

The shaft driven mid-mount mowers and grass catcher is easily attached and detached. Mowers are available in 48-, 54- or 60-inch sizes. The grass catcher blows clippings into three rear bags with a combined capacity of 9.75 bushels.

Contact the Kubota Tractor Corp. 550 West Artesia Boulevard, Compton, Calif. 90220. **Circle No 196**

Improved formulation... washes off easily.

Because accuracy counts.

For accuracy when spraying, put Tracker in your tank. It's the most concentrated liquid indicator dye you can buy.

See where you spray while saving time, product and money. Environmentally safe Tracker eliminates skip and overlapping, indicates drift and helps detect clogged spray nozzles.

Completely inert formulation won't react or interfere with product being applied. And new improved Tracker now washes off easily.

Whether you are spraying acres of fairways, renovating

turf areas or treating home or commercial lawns, choose Tracker. Because accuracy counts.

Put Tracker in your tank today. Contact your LESCO sales representative, visit the nearest LESCO Service Center or call us toll free.
