

Lasco Fittings wall chart details joints

Swing joints offering "everything you need for your major turf irrigation projects" are detailed in a new brochure from Lasco Fittings.

The brochure opens to a 24- by 11-inch wall chart for easy reference.

Called Full-Circle Swing Joints, they are offered in three models, each with three individual 360-degree adjustments to place sprin-

Abanaki catalog tells of Grabber line

A new catalog covering all six models of their new "Grabber" oil skimmer and decanter line is ready for distribution, reports Abanaki Corp.

Included are instructions for a simple test to determine if specific waste problems can be handled effectively with Abanaki equipment.

Grabbers will conserve wash water for re-use by removing waste oils; remove tramp oils from costly lubricants; prevent plugging of pipes, sprays, filters or sewers by removing waste oil, and permit discharge of oil-free water into lakes and streams.

They are particularly suited for coolant tanks, parts washers and filter systems; truck, rail and large equipment washing facilities; machine beds, sumps, draining and settling tanks; pools, basins - or any collector of oily liquids.

Main Abanaki offices are at 15 North Franklin Avenue, P. O. Box 149, Chagrin Falls, Ohio 44022. Circle No 292

kler heads exactly where desired. Each model—ready-made to eliminate field assembly, custom-made and assemble-it-yourself — is featured on its own page in the brochure.

Specification data and examples are provided to insure that contractors get the precise lay length, inlets and outlets required for a particular project.

The brochure is available at irrigation supply houses nationally or from Lasco Fittings, Philips Industries Inc., 3255 East Miraloma Ave., Anaheim, Calif. 92806; 714-993-1220. Circle No 291

NEW LITERATURE

Landscaping with Wildflowers

Environmental Seed Producers Inc.'s new publication, "Landscaping with Wildflowers," carries many suggestions on how to use wildflowers to beautify areas while cutting maintenance costs.

The four-page brochure provides detailed site-selection, soil-preparation and planting instructions that will ensure maximum success.

A price list with the brochure covers the 25 wildflower mixtures Environmental Seed Producers offers, including one formulated for every region of the United States.

The booklet is available by contacting Environmental Seed Producers, Inc., P.O. Box 5904, El Monte, Calif. 91734; 818-442-3330. Circle No 297

THIS MOWER CHANGED WALKING GREENSMOWER TECHNOLOGY FOREVER.

If you think advances in greensmower technology have leveled off, prepare to take off. The Bunton triplex is not only *new*, it's *better*. We started with fresh ideas and state-of-the-art technology and developed a truly well-engineered machine where every feature produces performance.

STARTING WITH FRESH IDEAS MEANT THE END TO COMPROMISES.

The Bunton triplex is light on its feet, yet heavy-duty in construction. Until now every greensmower ever built was a compromise designed to keep total machine weight down, to reduce turf compaction, at the expense of heavy-duty construction. Rather than striving to reduce total machine weight, our engineers concerned themselves with the pressure actually transferred to the surface. The result is more durable components that improve cutting performance. That means better greens surfaces... and for a longer time.

THE SOLUTION TO TRADITIONAL GREENSMOWER PROBLEMS.

We started by putting weight where it does some good. Our larger reel motors and counterweights sit solidly on the playing surface to eliminate bounce and produce a truer, more consistent cut. The unique traction wheel design allows more tire surface area to meet the green, to keep ground surface pressure low. Interchangeable parts keep inventories low and maintenance simple. Better performance results from a true hydrostatic transmission and dynamic braking, welded steel frame construction, extra oil filters, inde-

pendent reel operation, standard backlapping, and a powerful 18 hp Onan engine or optional 16.5 hp Kubota diesel.

And if that isn't enough, Bunton offers standard what others have as add-ons. With Bunton, what you demo, is what you get. And at a competitive price.

Call or write today for more information and a demonstration.

Ryan turf-care and equipment catalog is out

The newest catalog of Ryan turf maintenance and lawn care equipment is available from Cushman.

The full-color catalog shows the full line of Ryan aerators, from the riding "adjust-on-the-go" GA30 aerator to the larger, tractor-mounted and towed aerators for covering large turf areas quickly.

Also included are the current models of Ren-O-Thin power rakes/dethatchers, the Mataway overseeder, the new Ryan Spot-seeder, sod cutters and the Ryan Rollaire.
