

# HERE ARE THE MOVING PARTS THAT MAKE A YAMAHA LAST LONGER.

The crew at our new factory in Georgia is determined to make golf cars that run better and longer than anything else you can put on your course. It's a simple goal. But they achieve it with complex technology like electrostatic paint processing, robotic welding and intensive quality control

inspections. Over \$40 million in high tech systems

makes Yamaha USA's plant the most advanced of its kind—but it's the

dedication of our Georgia employees that ultimately gives every Yamaha the potential to drive up your fleet profits. To learn more, call 1-800-447-4700 for the Yamaha USA dealer near you.

Better in the long run.

# For the long run.

## Introducing a powerful new force in riding rotary mowers.

Now there's more to Cushman® Front Line® Mowers than top cutting performance. More power. More operator comfort. More endurance.

Now there's the new diesel-powered model Cushman 807.

Its totally integrated power train and new hydraulically-powered steering gives you unmatched performance over the long run. The 807 dispatches thick, wet grass on tricky maneuvers around obstacles without losing

ground speed. No other rotary mower gives you a cleaner cut.

At the heart of the new, four-wheel 807 is a powerful 21.5 horsepower, 3-cylinder Kubota 950 diesel engine. We've also included a heavy-duty Donaldson air cleaner and a new, heavy-duty Cushman PTO clutch to keep your new Cushman Front Line running longer. A complete family of Cushman Front Lines and a wide range of accessories are available to meet all your needs all

year 'round. Choose a 3 or 4 wheel design with 60- or 72-inch side or rear discharge mower deck. Or add the exclusive Cushman Grass Caddy™ system, which lets you cut, catch, and hydraulically dump 16 bushels of clippings without leaving the seat.

For a convincing demonstration contact your Cushman dealer today. Or call toll-free: 1-800-228-4444.

# Up front and pulling away with 4-WD power.

**New on-demand 4-WD model makes the extraordinary 5-gang LF-100 an even more productive lightweight fairway mower.**

Shift from 2-wheel drive to 4-wheel drive "on-the-go." The added traction helps deliver a flawless cut on those hillsides that other units can't reach.

**Up-front wing mowers give superior visibility and productivity.**

The operator holds a closer line to take full advantage of the 100" cutting width. This unique, up-front configuration also gives better access to all mowing units.

**Heavy-duty reels deliver a greens-like cut.**

The fully floating, 22-inch steerable 7-blade reels are heavier, to follow ground contours closely, for that smooth, consistent Jacobsen

cut that's the envy of the industry.

**True lightweight mowing.**

Extra-wide low-profile turf tires produce the lightest ground pressure, and the rear wheels roll on a different track than the front, so your turf thrives with less compaction.

**Built to last.**

A proven, rugged chassis, durable and simple hydraulic system and liquid-cooled diesel engine provide longer, trouble-free life on your fairways.

And the LF-100 is backed by your Jacobsen distributor for dependable parts and service support.

Ask your Jacobsen distributor for a free demonstration.

Attractive lease and finance plans available. Or contact: Jacobsen, 1721 Packard Ave., Racine, WI 53403.
