Jones challenges architects

Robert Trent Jones Jr. took over the gavel as president of the American Society of Golf Course Architects in April and promptly gave a rallying call for the building of 5,000 new golf courses in the United States in the next 10 years.

Jones, of Palo Alto, Calif., who took over the reins from Pete Dye, told ASGCA members at their annual meeting in Pinehurst, N.C.: "The National Golf Foundation says we must add at least one golf course every day for the next 10 years to meet the exploding demand for golf throughout the country.

"We should probably round that figure off to 5,000 before the year 2000 and consider it one of the greatest challenges that this organization has ever faced."

Jones said it is also "a tremendous challenge to the creative energy and talent of each one of us individually. The game has never been more popular than it is today, and it is our responsibility to meet that

Construction up 45 %

The growing wave of golf course construction in the United States rose 45 percent in 1988, according to the latest research by the National Golf Foundation.

With Florida leading the way for the fourth straight year, 211 new golf courses opened for play in 1988, compared to 145 in 1987. Another 716 were either under construction or being planned, compared to 513 in 1987, the study found.

Florida accounted for 35 new courses, while Texas followed with 20, Georgia with

Oregon's seed industry in trouble

BY MARK LESLIE

Oregon's State Legislature is considering a field-burning ban that would endanger the country's major providers of cool-season golf course grasses.

Oregon's 70 seed companies provide all U.S.-produced ryegrass, bentgrass,

Chewings and creeping red fescues, half the U.S.-produced tall fescue and about onefourth its bluegrass.

But in the process, between mid-July and the end of September each year, the 800 farmers who grow seed burn their fields to purge them of the weeds and disease that endangers the grass seeds. And last year when one farmer was burning a field, the wind changed direction, blew the smoke onto a major highway, and a seven-death, 37-care pileup resulted.

ClubCorp. contracted for Moscow site

BY MARK LESLIE

A U.S.-Russia joint venture company has contracted Club Corp. International to build and then manage an18-hole golf course, country club and conference center outside Moscow.

JV Dialogue, a company formed in November 1987 by Chicago Research and Trading owner Joe Ritchie and six Russian firms, plans the complex as part of a technical village it is building on the collective farm Leninski Lutch (Lenin's Light) outside Moscow.

Ritchie formed Management Partnerships Inc. to formally separate CRT from the Russian project. But CRT Executive Vice President Gus Pellizi is working on the plan and is upbeat about its prospects.

"The concept of the Leninski Lutch project is to develop a village which would enable people to live and work in a pleasant place with a pleasant environment," Pellizi said. "We thought what we would like to do was

Golfing public again grows

The number of golfers grew by more than 7 percent for the third straight year in 1988, according to a survey done for the National Golf Foundation.

In the survey not yet published, the NGF also reports that 211 new golf courses were opened in 1988

The survey found that the number of golfers who played at least one round last year rose from 21.7 million to 23.4 million, up 7.8

into real-estate developments.

and 910.000 were female.

The number of facilities, which in 1987 grew by 110 to a total of 12,407, rose another 161, or 1.4 percent last year.

The NGF also estimated the number of courses under construction in 1988 at 334, up 50 percent from the 223 being built in 1987. It said another 382 courses were being planned, a 32-percent jump from the 290 in 1987.

builders could keep up with the 500-course-

Pete Dye

Dye: Expect busy 1989

Golf course architects can expect the busiest year in a quarter century this year, according to Pete Dye, who in April completed a year as president of the American Society of Golf Course Architects.

Interest in new golf courses and remodeling projects continues to build, Dye said.

305 new courses and 268 remodeling projects are in progress.

developments and resorts, more municiboards.

"Our members are working diligently

Dye added that well-designed and maintained public courses, if properly managed, will generate substantial profits for municipalities and owners.

"Our members report an increasing number of inquiries for all types of projects," he said, "and society members project that 1989 will be the most active year in golf course construction and remodeling that they have seen in the past 25 years."

A recent ASGCA survey indicated that

Dye said that while most new courses are still being built as part of residential pal and public courses are on the drawing

with municipalities and individuals interested in building good public courses to come up with cost-effective designs that will attract golfers and provide a longterm recreational benefit to the communities involved."

Protection Agency) to fight, they have the a-year target set by American Society of Golf **Course Architects President Robert Trent** cost of land to fight, money problems to Jones Jr., Rossi said he wasn't sure but Rossi also noted that while there is a call added, "You have to keep in mind that a for more public courses, 87 percent of the nine-hole course is considered a new course new courses actually being built are tied and 47 percent of the courses in America are nine-hole courses" which, of course, can be Asked if the limited number of golf course built quicker than 18-holers.

demand with more and consistently better work.'

Jones noted that environmental groups have targeted golf courses. "Everyone in the golf course design business is an environmentalist," said Jones, once the chairman of the California State Parks and Recreation Commission and the designer of more than 150 golf courses around the world. "But there are others who call themselves environmentalists, who can make a golf course sound like a toxic waste dump or a polluting factory.

"We need those who love the game of gol fto unite solidly and loudly proclaim that a golf course is an animal habitat. It is a bird sanctuary. It is open space. It is a greenbelt. It is that most important factor that lessens the density of a new real-estate development."

Jones pointed to the oxygen-renewal process at work through trees on golf courses and added that a golf course is "enjoyed by those who pass by as well as by those who play on the fairways."

Jones called for the architects to join with

develop with CCI (ClubCorp. International) something that would be a nice facility which would be comparable to nice facilities here in this country where Americans could when they're in that country — whether it's for a week, a month or a year - and be able to do some of the things they do here at home; and golf is one of those things. We would like to also have tennis, and swimming and other things like that that are all part of the facility.

Pellizi added. "The idea is not to have a facility just for people with Dialogue. The idea is to put a hotel there as well as have it kind of a resort complex which would incorporate a hotel, living accommodations and a club facility, so that Americans or Westerners who are going there to do business could stay there and have a place to work and live."

JV Dialogue is now building the first unit for manufacturing computer software and hardware as well as housing units for the Russian and American workers.

ClubCorp. International Chairman Richard Poole is cautious about the project. "This kind of thing at this early stage is always iffy," he said. "You pay your money

and take your chances, and I don't want to blow any horns about the fact that it is a fait accompli or anything else. I've been down this road in many countries, and it's a timeconsuming, slow process. So I don't want to be ... saying we're doing this exact thing on this date, until I've actually got a dozer out there moving a couple hundred thousand yards of material."

But Poole, the point man for CCI President Jim Hinckley in developing golf facilities worldwide, said the Russians and Americans involved are serious about the project and its feasibility.

"The Russians," Poole said, "are trying to emulate the West. The Americans also said this would help give stimulus to the area for (them) and would have some obvious advantage for our people as well as for others. And if we're going to do a conference center as part and parcel of our village development then this would give it some unique cache."

The 7,000-acre collective is "anxious to expand its income sources, so is selling or leasing land for extra housing for both Russians and expatriates," Poole said, adding that the Russian head of JV Dialogue, Pyotr Zrelov, asked CCI to work with the company to develop a golf course.

"Would the land be suitable, how much land does it take, how should it be designed and built, that's how our discussions have been going," Poole said. "We would manage and/or own the property to the extent that anybody owns property in the Soviet Union." Poole said the region could have golfing

six months a year at best; then the complex would feature three or four months of crosscountry skiing.

A 'catchy deal'

"It's kind of a catchy deal but I wouldn't say that's the most optimum place to put a golf course if I were starting out to do it," Poole said. "The other side of it is that the relatively large population (of Americans) in Moscow is expected to grow - the best estimate is that it's now 30,000 and it's expected to double in the next three years. There is a fairly high demand, particularly among the expatriates living there, not necessarily the tourists coming in.

"It's not particularly a conducive environment for American style of living; you have to find something to spend your time doing," he added. "They are captive there, if you will, with no facilities that we have in the United States. And there will be some Soviets who will become involved but that's a lesser number."

The golf facility will include 40,000 square feet of clubhouse and conference rooms. CCI would add to that bedroom accommodations, based just purely on what the demand will be at the time, Poole said.

Poole said "at the very best we could be pushing dirt next spring."

The major holdup is the 26 or 27 different agencies' signatures needed to get land use.

"It is just slightly more severe than passing the Southern California tests of the environmentalists ... It's hard," Poole said.

Poole said CCI will probably use 160 acres for the course, "It's good land. It's timbered land with enough roll and trees that it's a highly desirable setting," he said.

CCI hasn't chosen an architect vet, and will wait until it gets further along in the bureaucratic process.

That lengthy process may explain why other courses are not built in Russia yet. Robert Trent Jones Jr. has been chosen to build one course close to Moscow.

"There's a lot of talk, but I haven't seen anybody with ... (equipment) sitting on the land clearing the site, or anything else," Poole said.

the NGF, Golf Course Superintendents Association, U.S. Golf Association, Professional Golf Association, the tournament players and the golf media "to proclaim emphatically that we need 5,000 more golf courses in the next 10 years.

"Because up to 70 percent of these new courses should be public rather than private, we especially need them in the cities, suburbs and counties where a town council or board of supervisors holds sway," he

said. "Instead of groundless and blind opposition, we should be finding encouragement and the anticipation of great opportunity."

He added that "in addition to the obvious beauty and recreation it provides, golf is also a great training ground for honor and integrity, and never before have more young people picked up their golf clubs looking for places to play."

Saying that a golf course has "at least a two- to three-year gestation period before it can be played," Jones said, "If we are arbitrarily slowed or stopped by the political process, and therefore unable to meet the rapidly evolving demand, I fear that the game of golf will on e day return to the elitist and expensive sport it once was, and none of us can afford that ... not this organization, not the game itself, and certainly not the precious environment of our sprawling towns and suburbs."

Jones, 49, is the son of Robert Trent Jones Sr., the only living member of the 13 golf course architects who founded the ASGCA in 1947. His father and brother, Rees, have previously served as presidents of ASGCA.
