NEW LITERATURE

Golf community directory helps home buyers

Hilary House Publishers Inc. has released a new, 296-page publication titled "The Directory of Residential Golf Course Communities."

Consumers can use this one source to research 280 of America's leading golf course communities for full-time, vacation or retirement living.

The publication includes information on when the community opened; age range of residents; how many owners use their home as a primary residence or vacation home; total acreage in the community; number of home sites and lot sizes available; whether the community is located inland or by the water; name of the closest airport; financial considerations (equity, initiation fees, dues, minimum food and beverage spending); number of holes; availability of fitness center, monitored security, clubhouse, pool, tennis, marina, equestrian facilities and fishing.

Also included are names of the course designer, golf pro and touring pros plus listings of the tournaments hosted by each community. Most important, each description discusses the sizes and styles of homes, availability of home sites and price ranges.

"The Directory of Residential Golf Course Communities" costs \$19.50 plus \$3 postage and handling. It can be ordered from Hilary House Publishers, Inc., 980 North Federal Highway, Suite 206, Boca Raton, Fla. 33432 or by calling 407-338-2120.

Turner flail mower literature offered

Industrial flail mowers are featured in new product literature published by Turner Equipment, Inc., a division of Elswick, Inc.

Marketed under the trademark "Roadrunner," the mowers are built to stand up to the most rigorous maintenance conditions.

Roadrunner flail mowers are available in three basic models and in a variety of configurations that mow a swath from 74 inches up to 21 feet, depending on the size and number of mid-mount wings and rear-mount units.

The mid-mount wings attach to the tractor with Turner's patented "T" mounting frames, designed to minimize stress on tractor assemblies.

The rear-mount units attach to the tractor's 3-point linkage and may be center mounted or offset.

All mowers feature unitized steel housings, gear-driven hydraulic pumps to combat hotweather extremes and dynamically balanced reels that can accommodate fine or coarse cut flails.

For a free copy of the new literature write Marketing Department, Turner Equipment, Inc., 4675 Granite Drive, Tucker, Ga. 30084 or call 404-934-5017.

Wittek features range equipment

Wittek Golf Supply's new eight-page color brochure features the latest in driving range equipment, including the Ball Hawk SL90 ball picker and Wittek Blue Grass Tee Mat.

The brochure also contains a variety of new range supplies and pro shop display fixtures for golf clubs and umbrellas.

The free brochure is available by calling Wittek Golf Supply Co. at 1-800-869-1800.

Flood

Continued from page 1

overflowed.

General Manager Jim Armstrong said the 135- by 40-foot pond that hugs the left side of the 11th green was "gone," along with its retaining walls.

While using a temporary green, Armstrong hired outside contractors and expected to have a new 11th green, retaining wall and creek banks constructed by late November or early December — "weather permitting."

Armstrong discounted rumors that the job would be done in 2-1/2 weeks, saying that while that would be possible, the other work had to be completed before greens reconstruction could begin.

Architect Ed Connor of Golforms in Ponce Inlet, Fla., who in 1987 created a computer model of the elevations and contours of all Augusta National's greens, said the club has the best topographical details of any course he had ever seen. Therefore, it would be easy to rebuild it to its original state as designed by Alister Mackenzie and Bobby Jones in 1933.

Neighboring Augusta Country Club was "fortunate," said superintendent Mike Crouch. "At least we've got grass."

With 12 inches of rain falling in 24 hours, Rae's Creek also overflowed onto Augusta CC's 8th green and left one-quarter inch or more of silt, washed out the riprap and damaged a bridge.

Crouch's crew aerified the damaged turf, then washed off the silt with high-pressure hose. He estimated the cost of the damage at less than \$10,000.

In South Carolina superintendents reported from 8-1/2 inches at Florence (S.C.) Country Club to 15-2/10 at Snee Farm Country Club in Mt. Pleasant.

Nelson Cato, superintendent at Woodside Plantation Club in Akin, said his course got 13 inches of rain in two days, nine inches of it falling in nine to 10 hours on Oct. 12. Nevertheless, he said some concrete cart paths and a pump house, where rain blew out a main disconnect, suffered the major damage.

The town of Mt. Pleasant helped Snee Farm by sending two tractor pumps to the spillway and pumping out 1,800 gallons per minute for two days, according to superintendent Billy Ford.

Superintendent Dennis Bowsher reported his Sunset Country Club in Sumter absorbed 12-13 inches of rain in two days. Though the driving range and tennis courts flooded, his sand-based course drained so well only a couple of sand traps were washed out.

Several superintendents reported they had just overseeded before the rains fell.

Superintendent Chuck Green at Florence lost some of his overseeding work, as did John Gay at Forest Lake Club in Columbia.

Bucky Hill, superintendent at Palmetta Golf Club in Akin, had closed his course for two weeks to overseed. The storms caused him to close it another four days, but he was thankful that his \$14,000 in seeds had mostly germinated.

"We had a pretty good river coming across 4, 5 and 6 fairways," Hill said. The 10-1/4 inches of rain completely destroyed the old dirt cart paths on the course, which was built in 1892 and remodeled by Mackenzie in 1940-

Hill had a contractor hall in clay and rock to build up the paths well enough to get play going again. But his crews were still scraping sand off the fairways in late October.

At Kiawah Island, Pete Dye's new course reportedly survived its first major test of water drainage in fine shape.

Assistant superintendent Milt Langley said Wild Dunes Golf Course on the Isle of Palms did not lose its 18th green, as had been rumored. But construction crews working on the new Dunes West course were slowed by mud since the cart paths and roads were not
