

# The Most Advanced 4-Cycle Engine In The Industry Comes In This Familiar Package.

E-Z-GO has revolutionized the golf car industry. Again. We put the most advanced 4-cycle engine in the industry into our gas golf cars. It's a 295 cc, twin cylinder overhead cam engine that delivers 8.5 rated hp. And no other golf car on the market has it.

Twin cylinders and a counter rotating balance shaft deliver a smoother,

quieter ride than any single cylinder engine available. And give you more usable torque for climbing hills.

The forced-air cooling system provides cooler engine operation. And the pressure-fed filtered oil system is more efficient in engine lubrication.

Less engine wear. Low maintenance. And long service life. No other en-

gine in the golf car industry can deliver the benefits this one can.

Even powerful acceleration. Trade-mark smooth ride. Precision performance. Unmatched efficiency.

Your players won't be able to resist the added comfort. You won't be able to resist the added value.

Just call 1-800-241-5855 to find

your nearest E-Z-GO Golf Car representative. Then test drive this car. And you'll find your new fleet.

# USING OUR VARIABLE SPEED PUMP STATION CAN HELP YOU SAVE VITAL PARTS.

Let's face it, in this business it pays to be backed by an industry leader. Because when your pump system goes on line, so does your reputation. And Flowtronex can help you keep both your golf course and your reputation intact with our incredibly reliable, power-saving pump station.

And how do we do all this? With an engineering breakthrough called Smoothflow™. Developed in 1986 by our team of engineers, Smoothflow is a sophisticated computer software program that automatically monitors and controls our pump station. Which means you no longer have a need for a pressure control valve. And because of this precise control, our Flowtronex variable speed pump stations (VSPS™) have made pressure spikes and pump-related line breaks nearly extinct on our more than 200 golf course installations.

Smoothflow software also helps budgets by slashing energy use 15 to 50% when compared to conventional pump stations using control valves. This is one of the many reasons our VSPS is the industry's most popular. In fact, superintendents have bought twice as many variable speed systems from us as all our competitors combined.

So if you're in the market for a reliable, power-saving pump station, call Flowtronex International. We've got quite a track record for standing behind our customers. And their bottom lines.

For more information, call **1-800-537-8778** or **903-595-4785**. Or write Flowtronex International, P.O. Box 7095, Tyler, Texas 75711.

## High Court ruling said 'scary'

By Peter Blais

The recent Supreme Court ruling freeing local governments to impose pesticide regulations that conflict with federal law could severely restrict the use of golf course chemicals, according to a Golf Course Superintendents Association of America official.

"It scares the hell out of me. It's

another step toward more regulations," said Charles Passios, government liaison to the GCSAA board of directors.

"It means superintendents are going to have more pro-active than ever, participating in the process and taking a lead role to make sure our concerns are heard when towns want to pass regulations."

In the case of the Town of Casey, Wis. v. Ralph Mortimer et al, the court ruled unanimously June 21 that the language of the Federal Insecticide Fungicide and Rodenticide Act does not allow it to pre-empt locally passed regulations.

The decision overturned a Wisconsin Supreme Court ruling that FIFRA

## Major changes expected in revisions of wetlands laws

By Mark Leslie

Wetlands preservation regulations that have handcuffed golf course developers and created long, expensive waits for approvals are being rewritten — and loosened extensively — on two fronts.

Revision of the much-maligned federal wetlands delineation manual — used by the Army Corps of Engineers, Environmental Protection

Agency, U.S. Fish and Wildlife Service, and Soil Conservation Service since 1989 — is under review and is said to more narrowly define what constitutes a wetland.

Further up Pennsylvania Avenue, congressmen have answered the call of voters and drafted legislation to correct deficiencies they see in the wetlands protection system.

Some conservationists are

angry. Linda Winter, director of wetlands programs for the Izaak Walton League, said a scientifically sound definition is "being thrown out and ignored for political reasons."

One EPA ecologist resigned and another asked that his name be dropped from the credits of the revision.

But others are looking forward to changes.

## First facilities open for handicapped

By Mark Leslie

Two golf facilities built especially for the physically challenged will open within the next month, marking milestones for the country's millions of handicapped people.

In Akron, Ohio, Edwin Shaw Hospital is completing the first course in the country designed especially for handicapped golfers. Dedi-

## End of drought won't solve Calif. woes

By Peter Blais

RIVERSIDE, Calif. — Water will continue to be in short supply for many years in California because of the six-year drought, increased demand from a growing population and environmen-

tal concerns, according to a Southern California water expert.

"We are going to see changes in our landscapes and maybe in our lifestyles if the shortages are severe enough and long enough,"

Coachella Valley Water District water management specialist Dave Harbison said during a recent water management seminar sponsored by the University of California, Riverside Cooperative

TO: JOE BLACK  
WESTERN GOLF PROPERTIES  
7711 E. GREENWAY RD.  
SCOTTSDALE, AZ 85260

The most important people in the golf course industry make our front page every month.

People like Joe Black, President of Western Golf Properties, Inc. ...

consultants and managers of more than a dozen courses from coast to coast.

Former President of the PGA, Chairman of the 1983 Ryder Cup Matches and 1979 & 1980 PGA Championship, Black calls *Golf Course News* a

"most informative golf course development publication." "It covers subjects that are current, important and impact the industry," he contends.

If you want to reach 20,000 of the most important people in golf ... decision makers at every course in America, call *Golf Course News* today.

It's "addressed" for success.

# On a golf course a bad score should be the only thing that stinks.

Foul odors, algae and sludge in golf course ponds are enough to ruin anyone's game. The results of poor water management can be unsightly, smelly and costly.

Now Otterbine has developed CONCEPT<sub>2</sub>, the new high-technology surface aerators that can revolutionize your approach to water quality management.

CONCEPT<sub>2</sub> High Volume aerators are built to last, made of stainless steel and tough, versatile thermoplastics, with a rugged, custom built motor and a virtually unbreakable stainless steel prop designed to handle large volumes of water.

And CONCEPT<sub>2</sub> offers almost unlimited versatility, with easily installed, totally interchangeable spray patterns.

SUNBURST<sub>2</sub> in Otterbine's CONCEPT<sub>2</sub> line answers the challenge of producing a sparkling water display with minimal effect on pumping rates.

CONCEPT<sub>2</sub> and SUNBURST<sub>2</sub>, fulfill the Otterbine tradition of scientifically designed, highly efficient, compact, self-contained aeration systems. They are simple to install and economical to operate.

They need no foundation, external pumps, or other costly plumbing fixtures. All Otterbine Aerators are safety tested and approved by the Electrical Testing Laboratory.

Call or write, today, to find out how CONCEPT<sub>2</sub> can help you keep your water quality up to par.

SUNBURST<sub>2</sub>

With the two new Jacobsen Aero King aerators, you get the widest selection of hole spacings on the market to handle changing aeration needs quickly and easily. Simply shift gears to select just the right pattern for the job.

**Most convenient controls in the industry.** Unlike competitive units, the self-propelled

T1224 puts all controls at the operator's fingertips for easier operation and increased productivity.

**Lower overall maintenance costs.**

Our virtually unpluggable tines last up to three times longer than competitive tines. So you get more consistent hole depth throughout your course, while spending less time and money changing tines. What's more, the Aero Kings' simple, durable designs are easier and more economical to maintain than gear-driven units. They also cover more ground in an hour than competitors, giving you the best overall aerator value.

The tractor mounted PT2448, with its 48" width, is small enough for greens but big enough for fairways and tees. The PT2448 features a storage frame and castors for fast, easy hook-up to an 18+ hp tractor.

To see just how much a single aerator can do, ask your Jacobsen distributor for a demonstration today.
