

When turf gets hot, Golden fires up his firetruck

Maine superintendent uses 1963 LaFrance to water his 18-hole course

By Mark Leslie

"I used to sell firetrucks. Now they're the heart and soul of my golf course," says Joey Golden.

Golden is the owner and superintendent at Springbrook Golf Club in Leeds, Maine, which uses a 1963 American LaFrance diesel engine firetruck to pump water to its 200-acre course. And Golden wouldn't do without the LaFrance, which, he said, is "the single most important piece of equipment we've got."

"We want to replace the piping but I'm not sure we'd part with the firetruck even if someone offered us a pumping station. We have good feelings about that firetruck."

Indeed, Golden declares a conventional pump would not work on Springbrook's bizarre irrigation design.

"You have to see the piping line to appreciate what the truck does," Golden said, showing blueprints with lines that go nowhere, or go straight up a hill rather than at a gradual angle. "That truck is working against odds you can't believe. An engineer would say it can't work. But it just overpowers all the piping deficiencies..."

"It's the same as a pumping station but has wheels and has more umph than anything else around."

The 1,250-gallon-per-minute LaFrance and its predecessor — a 1946 Buffalo 750-gpm gas firetruck — have provided the lifeblood, water, to Springbrook since 1969. That is when Shirley

— Joey Golden*

Hamel, Golden's father-in-law, bought the 3-year-old facility.

Hamel, then a Springbrook member, owned a fire equipment company and had taken the Buffalo in trade. He used it to replace a 500-gpm skid pump at the irri-

gation pond. He found the firetruck could water all 18 sets of tees and greens at the same time, something that has amazed visiting superintendents. (The clay-soiled fairways have never needed watering.)

Superintendent and owner Joey Golden, left, hooks up the 1963 American LaFrance fire truck that pumps water to the entire 200-acre Springbrook Golf Club course in Leeds, Maine. The 1946 Buffalo, above, which preceded the LaFrance, rests nearby.

As years went by, Hamel added more irrigation heads to the greens and tees, and still the firetruck was more than sufficient for the demand.

In fact, Golden said he has to hold back the pump to 90-pound pressure. "We have to be careful it doesn't get too high, or we'd blow the pipes right out of the ground, just like in *Caddy Shack*," he said.

"One spring we turned it on and lifted a few mainline pipes with a pressure surge. We respect its power."

When Hamel died six years ago, his daughter, Jeannine, and Golden took charge. Ironically, Golden was a fire engine salesman working for Blanchard Fire Apparatus in Hopkinton, Mass. He knew a lot about firetrucks but nothing about golf courses.

He has been on a high-intensity

learning campaign ever since. Yet the firetruck remains his pet love — and an attraction to his golf course.

In fact, the old Buffalo still resides on the premises. Passersby and golfers have offered to buy it. But his devotion to the old truck outweighs the money.

When the Buffalo's engine let go in July 1988, Golden called old friend Byron Brooks at Blanchard Fire Apparatus. Brooks gave Golden the LaFrance, saying he couldn't think of a better home for a firetruck than a golf course.

Golden is quick to fill in the blanks about both the truck's good and bad points.

Golden said besides overcoming the "nightmare piping system," it costs only \$300 to \$400 in diesel fuel to run each year. He also uses the siren to warn golfers
