THIS PART **TOOK 6 YEARS** AND \$250,000 TO DEVELOP AND YOU CAN'T FIND IT ON ANY OTHER PUMP STATION.

No other pump station on the market has a brain like ours. Designed by Flowtronex electrical engineers with input from dozens of golf course superintendents, Smoothflow™ is the only computer control software that makes full use of variable speed technology. This powerful new technology actually makes your life easier and your employees more productive by providing unmatched control flexibility and energy savings.

Sure, some companies have slapped variable frequency drives and a few basic controls on

their pump stations and called them "variable speed systems". But in truth, they don't even come close to the sophisticated technology of our pumping stations.

For example, our automatic diagnostic utility (ADU) constantly monitors and records pump station performance for easy review. If an alarm condition occurs, ADU lets you pinpoint the exact cause. And our automatic ramp up (ARU) eliminates water hammer by letting you select the exact time in pounds per second for your pump station to gradually ramp up to irrigation pressure. Smoothflow also can incorporate our Stress Reliever which lets you maintain reduced pressure (typically 60 to 80 psi) on your piping system during nonirrigation times. Plus you can count on our automatic power saver (APS) for substantial savings on your power bill.

So if you're looking for a new pump station, think of us. Once you examine all the advantages of Flowtronex International, you'll agree buying our pump station is a very smart decision.

For more information call 1-800-537-8778 or 903-595-4785. Or write Flowtronex International P.O. Box 7095 Tyler, TX 75711.
