

It's What's Below The Surface That Counts!

High Density Polyethylene Float:

Filled with US Coast Guard approved closed cell foam. Always floats level, stays afloat even if punctured or damaged. S/S fasteners provide longer life.

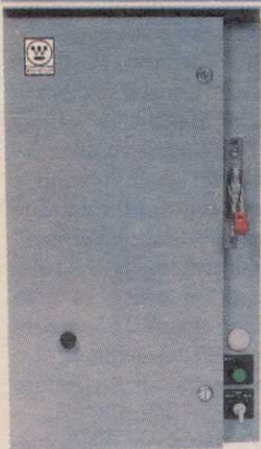

4 Pole/High Torque Motor:

Designed specifically for aeration. Runs longer and cooler at 1725 RPM. Easy to maintain. Rebuildable, not disposable.

Lubricating Oil:

Developed by a major oil company for lubricating and very low dielectric capabilities. Acts as heat transfer.

Power Control Center:

Exclusive Westinghouse motor controls provide maximum built-in protection. UL, CSA and ETL approved. Standard equipment, not an option.

Safety Tested:

All Otterbine aerators are safety tested and approved by ETL.

High Volume, Low Pressure Impeller:

Designed to aerate and move large volumes of water. Precision pitched Stainless Steel affords increased efficiency.

Plug-Type Underwater Connector:

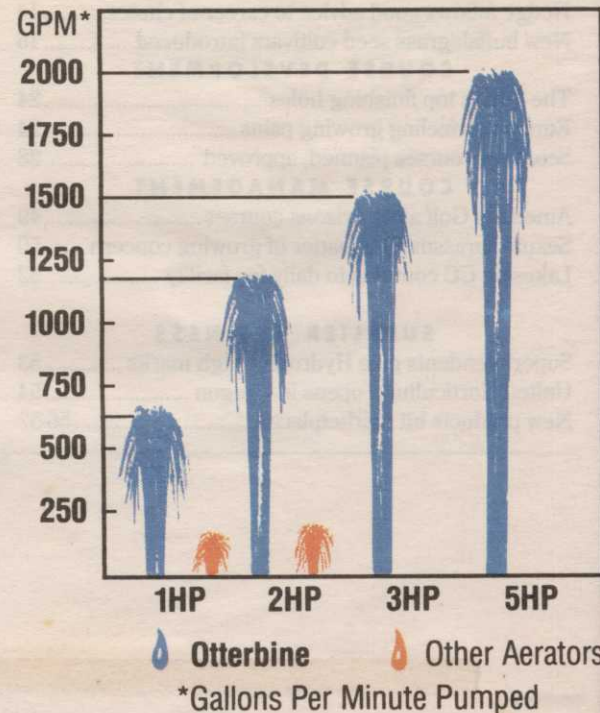

Designed for Otterbine. Easy connect and disconnect makes installation and service simple.

Strong Distributor and Service Network:

Over 130 distributors nationwide with 35 service centers staffed by factory trained personnel.

Otterbine®
We are the competition.

Tough On Diseases. Easy On You.

New Duosan® WSB is safer and easier to use—you handle only the bag, not the fungicide. And, the pre-measured soluble bags insure accurate applications every time.

Because each soluble bag contains both a contact and systemic fungicide, Duosan WSB is tough on

diseases. It's labeled to control a broad spectrum of diseases on turf, trees, shrubs and flowers.

Duosan WSB eliminates the need to purchase and store separate fungicides.

Order new Duosan WSB today.

Available in 12 oz. soluble bags (4 x 3 lb. case). Contact your Grace-Sierra distributor or call us toll free at 1-800-492-8255.

Make it easy on yourself. And tough on diseases. With Duosan WSB fungicide in water soluble bags.

GRACE SIERRA
Tournament Condition Every Day.

Duosan WSB is not yet available for sale in California. © 1991 Grace-Sierra Crop Protection Company. Duosan is a registered trademark of Grace-Sierra Crop Protection Company.

Pre-emergents light goosegrass before it gets started

Yamaha wants you to know where we're coming from.

This-2 technology provides light weight, compact, fuel-efficient, and the flexibility of a conventional engine. The engine also provides virtually no maintenance or "lock-off". The result, more value from the battery you apply with an overall improvement in fuel quality.

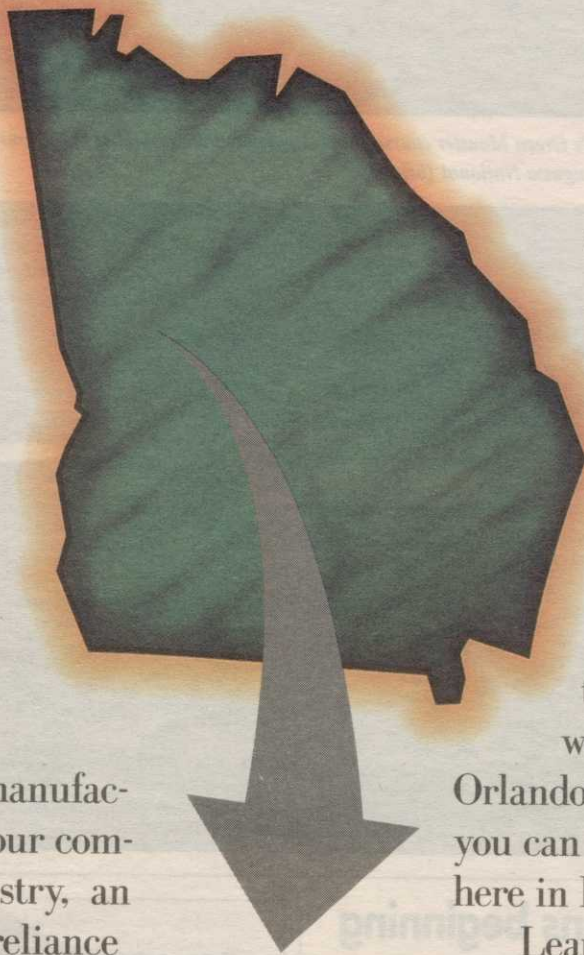

For more information about This-2 batteries and their performance advantages, contact your local Tech Rep. Or call 1-800-543-0001.

Growing Better Through Technology

The reason has long been the benefits of battery cooling and efficiency, but now that performance comes in a premium price. With its unexcelled This-2 technology, Tech Reps can offer you the performance of advanced power cooling technology at a price comparable to traditional units. This-2 technology offers a superior alternative to lead-acid batteries, with extended service, excellent fuel economy, and more power-to-weight ratio. Tech Rep This-2 battery is a dry, dense, free-flowing, specially designed wet-cell technology, specifically designed for use with a standard generator. With This-2 technology, there's a natural potential for both low on-off and maintenance. And its "efficiency" of release results in a significant reduction in operating costs.

Georgia.

If you think Yamaha makes Japanese golf cars, maybe it's time you brushed up on your geography.

Truth is, Yamaha cars are made in America. By Americans.

Our expert teams roll superior golf cars off the assembly line every day in Newnan, Georgia -- the home of Yamaha's state-of-the-art manufacturing facility. It represents our commitment to the U.S. golf industry, an assurance of our continuing reliance on cutting-edge technologies.

We also take a future-minded approach to fleet-management. Our corporate size and golf industry experience allow us to tailor comprehensive financial pack-

ages for fleet operators. We, in conjunction with our nationwide dealer network, can help you advantageously invest in a fleet that maximizes revenue and return on investment.

The result is profit-building fleets in demand the world over. And whether we export those cars to Orlando, Florida or Osaka, Japan, you can be sure they were built right here in Newnan, Georgia.

Learn more about the efficient, reliable fleets made in our Georgia factory by calling 1-800-447-4700 for the Yamaha USA Golf Car Dealer near you. He'll show you proof that Americans do indeed make the world's finest cars.

YAMAHA USA
Better in the long run.

For mowing performance features, nothing else can make this cut.

Superior greens start with superior greens mower features. And the all-new Greens King® 422 is loaded with them.

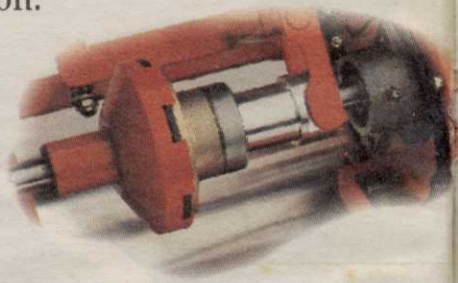

Exceptional side-to-side, front-to-rear balance and a more compact roller base help accentuate your greens' details, rather than your mower's limitations.

Our new 11-blade, electronically balanced reel delivers an unbelievably smooth cut, even down to 5/64." Plus, our exclusive Turf Groomer® option simply produces faster, truer, healthier greens than any imitator.

Clutch performer.

No other walking greens mower can touch the 422 for reliability. Our all-new clutch has been tested out to the equivalent of 70 years of operation, without any adjustment or lubrication.

The same eye for quality extends throughout this unique machine—from our space-age, long-life bearings and

bushings, to the most durable drive belts made, to the powerful, high-efficiency 4-hp, 4-cycle OHV Honda engine.

With features like drop out drive drum, reel and bedknife, and easy, slide-apart traction roller with built-in differential, the Greens King 422 cuts maintenance time as neatly as it cuts grass.

See for yourself why it's a whole new ballgame, ask your Jacobsen distributor for a complete demonstration.
