IRRIGATION EXPO A MAJOR DRAW

The Irrigation Association is planning its annual four-day International Irrigation Exposition and Technical Conference, Nov. 1-4, at the New Orleans (La.) Convention Center.

The IA expects more than 4,000 people to visit and more than 400 booths to feature the latest innovations in irrigation technology and equipment.

More information is available from the IA in Arlington, Va., at 703-524-1200.

GEORGIA CHANGES DATES

Due to a conflict with the Georgia-Florida football game in Jacksonville, Fla., there has been a change in the dates for the Georgia Golf Course Superintendents Association annual meeting.

The meeting has been moved from Nov. 1-3 to Nov. 8-10. It will take place at the King & Prince Hotel at St. Simons Island, with golf on Sunday and Monday at Hampton Club.

Further information is available from Karen White at 404-769-4076.

ALABAMA JOINING GEORGIA

Members of the Alabama Golf Course Superintendents Association will be adding an additional date to their calendar this year. They will join the Georgia GCSA at their summer meeting at Callaway Gardens Resort, Aug. 2-4.

The educational session, held Monday morning and all day Tuesday, will include topics such as golf course renovation and construction, negotiating, preparing for the Southern Buick Open, recovering from summer stress, using pre-emergent herbicides and governmental regulations.

Attendees will have the opportunity to play the Mountain View Course on Monday afternoon under conditions similar to the Southern Buick Open, thanks to superintendent Gary Wilder.

For further information, contact Karen White at 404-769-4076.

FLORIDA TURFGRASS SHOW SET

JACKSONVILLE, Fla. — The Florida Turfgrass Association's annual conference and show is due Sept. 20-23 at the Prime Osborn III Convention Center here.

The gathering, largest of its kind

in the Southeast, will include educational sessions, workshops, research reports, golf tournament and a spouse program.

For details, call 407-898-6721.

MILLER DEAD

Johnny Miller, former member of the Central Florida Chapter of the Florida Golf Course Superintendents Association, died April 11 after a long illness.

The former superintendent at Oceanside Country Club in Ormond Beach also was a member of the FTGA and the GCSAA.

Miller was buried in his home state of Ohio.

North Central

GROUNDS MANAGEMENT

CONCLAVE SET

The first Midwest Grounds Management Conference will target topics ranging from govern-

ment regulations to use of computer design for landscapes, integrated pest management, maintenance by design, and recycling.

Set for June 17-18 at Miami University in Oxford, Ohio, the conference is co-sponsored by the Professional Grounds Management Society and Midwest Association of Physical Plant Administrators.

More information is available from PGMS at 301-667-1833.

VIDEO PROMOTES LANDSCAPE

ORDINANCE

The Ohio Nurserymen's Association has produced a 12-

minute videotape, Landscape Laws That Work, to encourage city leaders to consider adopting a landscape ordinance in their communities.

Eleven other Ohio green industry organizations financially supported the project.

The video is intended for presentations to city councils and other government agencies, chambers of commerce and social and civic organizations.

Along with accompanying written material, it illustrates the benefits of sound land management through effective landscape design.

The Hydro-Wet® Story Still Holds Water After 20 Years.

RESIDUAL EFFECTS OF TURF WETTING AGENTS TESTS CONDUCTED BY MICHIGAN STATE UNIVERSITY

Wetting Agent	% Soil Moisture 14 months after application	Turfgrass Quality (1 = best)
None	5.4%	4.2
AquaGro®	6.7%	3.4
Hydro-Wet®	8.3%	2.1

Refer: Michigan Turfgrass Proceedings, Vol. 4, Jan. 1975
Boyne Highlands Golf Course
Applied July 1973, Evaluated September 1974

No other wetting agent can match the staying power of Hydro-Wet. So no wetting agent does as much to increase water efficiency.

This staying power is shown in this test. Fourteen months after application, turf treated with Hydro-Wet delivered 53% more moisture to the root zone. What's more, Hydro-Wet had 23% greater staying power than AquaGro.

And the quality of the Hydro-Wet treated turfgrass was significantly better. Hydro-Wet rapidly moves water into the soil where it belongs. Hydro-Wet ensures uniform infiltration and reduces runoff and evaporation. Hydro-Wet boosts soil moisture, which is so important to turfgrass during periods of moisture stress.

Best of all, the same Hydro-Wet formulation has been successful in university trials and on America's golf courses for 20 years.
