MultiGreen II

"Like a shot of Vitamins!"

Iron and micronutrient deficient turf and ornamentals respond quickly to MultiGreen II. Iron, zinc, copper and manganese are chelated in natural sugars which prevents chemical reaction with soil and keeps the micronutrients available for maximum plant uptake. Nothing improves root growth, color and stress tolerance more.

MultiGreen II tank mixes with many pesticides for beneficial results. Its natural spreader sticker properties enhance the results of many chemicals while providing all the micronutrients needed for the healthiest possible turf and ornamentals. And all this without burning the foliage.
