# SURF-SIDE®

Wetting Agent

## MARSHALL FEARING

CASTLE PINES GC  
HOME OF THE INTERNATIONAL  
TOURNAMENT, CASTLE ROCK, CO.

For the "International" we spray every thing inside and outside the gallery ropes with Surf-Side 37 and Iron. Our fairway program during the summer is 3-oz Surf-Side / M and 1½-oz Iron / M applied every other week. We don't water-in the application. The Iron mixed with Surf-Side does wonders for the grass! Greens receive 1 qt. / M Surf-Side to start the season. Back in 1986 we had lots of fairway areas that didn't take water well. Localized dry spots were a real problem due to thatchy turf and a clay-gravel soil. With 40 days over 90°F and winds coupled with 15 to 25% humidity the exposed sites dried out rapidly. A program of aeration plus Surf-Side has reduced this problem significantly. At Castle Pines hand watering isn't just hand watering any more... any remaining dry areas on fairways are hit with Surf-Side using a quick coupler and a 5-gal tank proportioner containing a premix of 1½ gals Surf-Side 37 to 3½ gals water. This gives us one quart Surf-Side to sixty gallons water applied as a drench. A repeat application usually isn't needed for up to 4 weeks. Our fairways are irrigated twice a week. When conditions warrant we also premix Surf-Side and Iron (with water) in a 50 gal tank and inject this into the irrigation system. Fairways were originally seeded to Seaside and Astoria bent. Tees and greens to Penncross. We now overseed fairways with Penncross and SR 1020.

**SURF-SIDE DOESN'T BURN, DISCOLOR, OR ROOT PRUNE**

SUPERINTENDENTS MUST ADAPT RATES TO INDIVIDUAL GOLF COURSE CONDITIONS
