fertilizers to the new Desert Turfgrass Research Center at the University of Arizona.

"These specialized fertilizers are what we need to maintain our greens throughout most of the year," said Dr. David Kopec of the university.

RESEARCH DONATION

The Rocky Mountain Regional Turfgrass Association has awarded \$32,000 to the Rocky Mountain Turfgrass Research Foundation for research and scholarships.

The RMRTA has donated more than \$120,000 to the foundation over the past five years.

Missouri Department of Natural Resources for the necessary permits, the DNR said.

State law requires land disturbance activities of five acres or more to have a permit to discharge storm water.

"Many owners and developers are not aware that they may need a storm water discharge permit," said DNR Director David Shorr.

Permits should be applied for 90 days before start of construction.

There is a \$150 fee for a general permit, and certain activities are exempt.

JEFFERSON CITY, Mo. — Missouri's construction activities are moving into high gear for the summer, but many people are unaware they should contact the

TEXAS TURF SURVEY

The Texas A&M staff anticipates it may take two years to complete a survey designed to gauge the economic impact of the turf industry in Texas.

The survey will deal not only with large turf areas such as golf courses and athletic fields, but also cemeteries, parks, roadside parks, and individual homeowners who maintain their own yards.

The Texas A&M staff informed the Texas Turfgrass Association board of directors about the study at the board's spring meeting.

WTGCSA HONORS CROSBY

Lonnie Crosby joins Harrel Sanders as the only Class H members of the West Texas Golf Course Superintendents Association. This honor is presented to individuals who, in the opinion of the WTGCSA executive committee, have distinguished themselves in any worthy field directly or indirectly related to turfgrass management.

Having retired in January, Crosby is an adviser to Cisco Country Club. He began his career in 1968 as superintendent at Snyder Country Club. He moved to Meadowbrook Golf Course in Lubbock six years later, then moved to Winkler County Golf Course in Kermit, where he worked until his retirement.

KEEPING TABS ON LEGISLATION

The LoneStar Golf Course Superintendents Association is monitoring various bills before the state Legislature. They range from local rule to who will be able to apply pesticides and where.

TTA CONCLAVE SET

The Texas Turfgrass Association will conduct its summer conference July 18-20 at San Luis Hotel in Galveston.

BECAUSE NO PRE IS PERFECT.

Hoechst-Roussel Agr-Vet Company

ACCLAIM®
IEC HERBICIDE

Hoechst Roussel

Even if you use the best crabgrass preemergence herbicide, you'll probably still have to deal with escapes just a few weeks later—and throughout the season. So start your regular low rate treatments of Acclaim® IEC Herbicide when you see the first escapes. And get season-long crabgrass control that no pre alone can match.

Unlike broadcast-applied pre's, Acclaim can be spot sprayed to control crabgrass on tees, along cart paths and in other "HOT SPOTS."

And, while preemergence herbicides can prevent you from reseeding when you need to, Acclaim lets you reseed fescue and ryegrass immediately after the spray dries.* Acclaim can be safely used on bluegrass, ryegrass, zoysiagrass, fine fescue, tall fescue—even bentgrass fairways and tees.

Acclaim controls growth from the 1-leaf stage right up to just before seed head formation. This year, be ready with Acclaim... because no PRE is perfect.

*Wait 3 weeks for bluegrass zoysiagrass, bentgrass

Crabgrass Stages Of Growth
