BRIEFS

KOCH, ROBBINS JOIN FORCES

TAMPA, Fla. — Gary Koch, president of Gary Koch Golf, Inc. and Richard Robbins, president of Robbins & Associates, International, Inc. have formed Robbins Koch Golf Designs, Inc. Robbins Koch will provide golf course design, master planning and construction management services in the United States, as well as selected projects in Asia. Koch, a six-time winner on the PGA Tourand golfanalyst for ESPN-TV, began his career in golf course design in 1990 when he was selected to design the Las Colinas course at Mission Inn Golf and Tennis Resort, near Orlando. Robbins has actively practiced course design, land planning and project management for more than 20 years.

MORE BUILDERS CERTIFIED

CHAPEL HILL, N.C. — The Golf Course Builders Association of America has approved a second group of companies as certified golf course builders. They are Central Florida Turf of Avon

Bill Kubly, certified

Park, Fla. (Jeffrey Harstine, president); Environmental Golf of Santa Ana, Calif. (S. Gene Giannulli, president); Fairway Construction of Temecula, Calif. (Glen A. Gosch);

Landscapes Unlimited of Lincoln, Neb. (Bill Kubly, president). GCBAA Executive Director Phil Arnold called the certified builders "a very elite group."

MASON'S AWBREY GLEN OPENS

BEND, Ore. — The Awbrey Glen Golf Club held its grand opening July 23-25, featuring the groundbreaking ceremonies for its 15,000-square-foot clubhouse. Mark Wendt Construction has been awarded the contract to build the clubhouse. The 18-hole, 7,007-yard championship private golf course, designed by Gene "Bunny" Mason, is now open to members and limited outside play.

NIEBUR MOVES, KEEPS BUSY

MEDFORD, Ore. — Niebur Golf, which has been operating out of Atlanta, Ga., has moved its headquarters here, according to Joe Niebur. Niebur recently completed construction of AnnBriar Golf Course in Waterloo, Ill., and is working on an 18-hole course that will be the centerpiece of the Meriwood at Hawks Prairie subdivision in Olympia, Wash. Weyerhauser and Vicwood are developers and Bill Overdorf is the course architect for the Meriwood facility. Niebur's new address is 820 Crater Lake Road, Suite 205, Medford 97504; 503-779-2771.

Swan-e-Set bills construction as embracing 'new era' of harmony

By PETER M. BRUYERE

n its promotional brochure, Swane-Set Bay Resort and Country Club claims it "embraces the new era of environmental harmony in which man and nature can once again find a rare beautiful balance."

Swan-e-Set is the \$120 million Lee Trevino-designed golf course soon to open in the Lower Mainland of British Columbia, Canada. The 36-hole course will be spread over 922 acres of riverfront property.

To ensure "environmental harmony," the Swan-e-Set Environmental Task
Force was formed. It was comprised of members from the provincial and federal ministries of the environment, as well as members of the Department of Fisheries and Oceans, and Canadian Wildlife Services. TERA Planning, an environmental consulting firm, rounded out the committee. In conjunction with eight other firms, TERA put together a 400-page environmental impact assessment.

According to TERA President Helmut Urhahn, there is a "no net loss" policy for fish habitats in British Columbia. During construction of a golf course, if a fish habitat is lost, a new one must be

The 16th hole at Wailea's new Gold Course.

Robert Trent Jones Jr. adds touch to the 'new look' at Wailea resort

From staff reports

MAUI, Hawaii — Two distinctly different golf courses — one wild and demanding, the other traditional and landscaped — are taking shape at the former Orange Course at Wailea, with housing nowhere in sight.

Robert Trent Jones II International is completely changing the old 18-hole Orange Course into two tracks, a new Orange Course and a Gold Course. Combined with the resort-style Blue Course, these will give Wailea 54 very varied holes.

Jones' lead architect Gary Linn said the "pure golf" facility is new for Maui and rare for anywhere in the Hawaiian islands. The no-housing concept was incorporated by Shinwa Golf Group when it bought the property several years ago.

When the project is complete, none of the original 18 holes of the Orange Course

Tennessee offers \$20M in bonds for golf projects

By MARK LESLIE

NASHVILLE, Tenn. — Developers are being invited to apply for \$20 million in general obligation bonds the state of Tennessee is offering for construction and operation of golf courses on state land, including eight state parks.

Under discussion for years, the plan was passed by the state Legislature on July 1. The deadline for proposals is Sept. 15.

Erskin Bonds, who manages the state's golf courses, said feasibility studies were done in 1988 for Reelfoot Lake State Park in Tiptonville, Chickasaw State Park in Henderson, Natchez Trace State Park in Wildersville, Tims Ford State Park on Normandy Reservoir, Rock Island State Park in McMinnville, Panther Creek in Morristown, Cedars of Lebanon State Park in Lebanon, and Old Stone Fort in Manchester, where a nine-hole course already exists

State land available for feasible projects

and nine more would be added. He said non-park state land could also be used, if an appropriate parcel is found.

"There's always a demand for golf courses," Bonds said. "How much, I don't know. We do very well with the eight we currently operate." The state has eight golf courses in state parks — seven championship layouts and the nine-holer in Lebanon.

Bonds said all types of proposals will be accepted.

"There are any number of options. A person may give us a lockand-key arrangement and make it work. Maintenance contracts could be involved. We could run it...

"But in any case, they have to pay off the bonds in 20 years. After Continued on page 23

A Mark McCumber:
Designer cum
Tour pro

Mark McCumber is an anomaly in this world of golf and course architecture.

McCumber was designing his first golf course before he earned his PGA Tour card. He learned golf, and to love the game early, growing up at Hyde Park Golf Club in Jacksonville, Fla., where he and brothers Jim, Gary and Tim earned free greens fees by digging up crabgrass. They later formed a golf course construction company that has evolved into Mark McCumber & Associates architectural firm in Jacksonville.

McCumber has juggled his playing career,

Golf Course golfers — you members of the you're serious? In you're seriou

winning close to \$3 million, with his love for

Golf Course News: Only two professional golfers — you and Jack Nicklaus — are members of the American Society of Golf Course Architects (ASGCA). Obviously, you're serious about this part of your work. How serious? And how does it compare to your devotion to the play-side?

Mark McCumber: I think my situation may be one of the most unusual of Tour players who are doing "golf architecture." My brother started a landscape company in 1969. Out of school [Brooklyn Bethel College in Brooklyn Heights, N.Y.] I went to work for him in 1971—literally working in the ground as a landscape designer, doing state jobs,

regional malls, big irrigation jobs. We used to get irrigation jobs for golf courses back in the early '70s—always knowing we wanted to be in the golf course building and design business, preferably design. But we had to get into it by the back door by the construction side. In 1978 we got our first piece of land and started designing our first golf course before I even had my Tour card. So I got my Tour card in July of 1978 while we were in the middle of designing our first golf course—The Ravines, which to this day is one of our most dramatic pieces of land. So the irony is that this is something I had been doing before I ever won money swinging a golf club.

I have a passion for both — tremendously and equally. The one thing I am trying to do this year — which has made both jobs better — is try to segregate the two. They are intertwined, but while I'm playing I'm trying to only think about playing those five days on tour. Then when I come home, I'm dedicating time to design.
