

Steam that mower clean

Sioux Steam Cleaner has introduced a combination steam cleaner and hot-pressure washer for cleaning and maintaining golf course and turf equipment. The Sioux Model 160-C is designed to combine steam cleaning (up to 200 degrees), hot-pressure washing and cold-pressure washing in one unit.

While able to remove mud, dried-on dirt and grease from vehicles and grounds equipment, the Model 160-C will also sterilize mower parts, halting spread for weed seeds, spores and fungus to other lawn areas. It can also de-ice frozen valves and machinery during the winter.

For more information, contact Sioux Steam Cleaner at One Sioux Plaza, Beresford, S.D. 57004; or call 605-763-2776.

Landscape software

LANDCADD International has introduced Site Designer, a new stand-alone computer-aided drafting (CAD) software program featuring site-planning and landscape tools, irrigation and estimating capabilities, and basic cogo functions. It's designed to address the land planning needs of contractors, design-build firms and smaller landscape and architecture offices.

Site plan tools include dimensioning, topography and lot layout. Growth simulation is provided along with access to an external plant database with 150 plants. Irrigation functions include automatic- and manual-head location and pipe labeling and sizing.

For more information, contact LANDCADD at 7388 S. Revere Parkway, Building 900, Englewood, Colo., 80112-3942; or call 303-799-3600.

Markers that bounce back

The new FlexStake FG400 series of hazard and yardage markers retains all the mow-over capability of the SF200 markers, plus they float — to discourage vandals who have made a habit of throwing markers in water hazards.

Using a patented Miles utility profile, the FG400 features a two-chamber, UV-protected, color-impregnated, polycarbonate extrusion. The markers are made of 100 percent plastic, with no steel springs or metal spikes that can harm a person or reel mower.

For more information, contact FlexStake Inc. at 2348 Bruner Lane SE, Fort Myers, Fla., 33912.

TriKote, new & improved

Pursell Industries has announced an advancement in its sulfur-coated urea (SCU) and other sulfur-coated fertilizer (SCG) coating technology.

TriKote is a triple coating process designed to safeguard against excessive sulfur coating cracking often caused during fertilizer handling. With fewer broken coatings, TriKote is designed to increase the amount of fertilizer retained in the slow-release form. TriKote calls first for a thin layer of sulfur to be coated on the fertilizer granule, followed by application of two co-reactive monomers. The liquid monomers are sprayed on separately but polymerize together, forming a protective polymer sealant. For more information, contact Pursell Industries at ; or call .
