MARRIOTT SIGNS ON TO AUDUBON

ORLANDO, Fla. — Marriott Golf has announced that the 18 facilities it manages are participating in the Audubon Cooperative Sanctuary Program for Golf Courses, including its two newest properties, Grande Vista in Orlando and Kierland Golf Club in Scottsdale. "This portfolio-wide membership exemplifies our commitment to an alternative approach to golf course management and development," said Tom Schlick, Marriott Golf's director of grounds operations. "Marriott Golf's goal is to achieve greater balance with the environment."

RHODY'S FIRST SHOW A SUCCESS

PROVIDENCE, R.I. — The first Rhode Island Turf Conference drew more people than expected and from a wider region, attracting superintendents from Long Island and the Metropolitan New York area as well as Connecticut, Massachusetts, Maine and New Hampshire. Speakers included Dr. Houston Couch of Virginia Tech, and Noel Jackson and Bridget Ruemmele of the University of Rhode Island.

GREEN INDUSTRY EXPO SETS SITES

CINCINNATI, Ohio — Organizers will hold the Green Industry Expo at the Cincinnati Convention Center, Nov. 18-21, with an outdoor equipment demonstration at Schmidt Field on the 21st. Plans are already in place to hold the 1997 show in Charlotte, N.C., on Nov. 17-20, and the 1998 event in Nashville, Tenn., Nov. 14-19. They said Cincinnati is less than 60 minutes by air or an easy day's drive for more than 60 percent of the nation's population.

IOWA HONORS FAGERLIND, OTHERS

DES MOINES, Iowa — The Iowa Golf Course Superintendents Association (IGCSA) named Steve Fagerlind of Beaver Hills Country Club in Denver the Superintendent of the Year during the annual turfgrass conference here. The IGCSA also presented the Distinguished Service Award to Dick Bruns of the city of Cedar Falls and the Charles Calhoun Award to Courtney Konstanz of Gowrie Golf & Country Club, and named Larry Parker of Fort Dodge Country Club the Assistant Superintendent of the Year. Meanwhile, the IGCSA donated \$13,500 in scholarships to students and \$44,000 to Iowa State University for turfgrass research.

GCSAA commissions comprehensive water study

ORLANDO, Fla. — The Golf Course Superintendents Association of America (GCSAA) has awarded a research grant to Environmental & Turf Services (ETS) to critically review water-quality monitoring results from golf courses across the country.

"Very few golf course monitoring studies have been published in peer-reviewed literature," said Dr. Stuart Cohen of ETS, principal investigator of the project and the director of the Cape Cod Study of golf course ground water. "This effort will be a major step beyond the Cape Cod Study [which summarized results of four golf courses]. It will also be a significant expansion in depth and breadth beyond the

article we wrote for the February 1994 issue of Golf Course News."

That story summarized the results of 13 studies of 25 golf courses from Massachusetts to Guam. The results of the studies were overwhelmingly favorable for the golf course industry.

Approval of the proposed new research was made by GCSAA's board of directors at the International Golf Course Conference and Show here.

The project will be a comprehensive summary of other studies. The objective is to publish a critical evaluation of the impacts of golf courses on ground and surface water quality. Attempts will be made to draw meaningful conclusions.

A summary article will appear in GCSAA's Golf Course Management. At least one technical paper will be written for publication in a peer-reviewed scientific journal, which could affect local government and regulatory agencies and scientists around the world.

Although the U.S. Golf Association has spent millions of dollars in the last few years to fund pesticide and nutrient fate studies, they were conducted in laboratory settings and at university field stations, not golf courses. The ETS study is intended to coordinate information from studies specifically designed to sample surface and ground water from golf courses.

New bents need different care

By PATRICK M. O'BRIEN and CHRISTOPHER HARTWIGER

Much of the discussion on the new bentgrass varieties has focused on differences like color, texture and summer performance. But information on how best to maintain these varieties has been limited. Should they be maintained similarly to the most common bentgrass, Penncross, or are changes necessary in the basic management program to maximize their performance?

An overwhelming majority of superintendents with one of the new varieties such as Crenshaw or the new Penn series (A-1, A-4, G-2, G-6) believe maintenance programs need to be modified to manage them effectively. Here is a review of these management differences and specific practices that may need to be modified.

The 1990s have been an exciting time for bentgrass managers. More varieties are available than ever before. Many were

David Stone at his bentgrass test plots at The Honors Club.

developed to improve tolerance to the high heat and humidity common to the Southeast. Many new varieties have a higher plant population per unit area compared to Penncross and offer the golfer a higher level of putting quality. The combination of these improvements results in varieties with improved playability char-

Dealing with big brother

By TERRY BUCHEN

Superintendents who do not receive certain fringe benefits from their employers, take note: The Internal Revenue Service (IRS) likes to use the buzz words "reasonable and necessary" in defining tax deductions if you are itemizing your income tax return for calendar year 1995. How does this relate to golf course superintendents? Let's take a closer look.

Golf clubs, shoes, umbrellas, bags and head covers are considered "tools of the trade" and are tax-deductible as legitimate business expenses. Golf hats, shirts, sweaters and jackets are considered uniforms as long as they have the superintendent's golf course logo and/or name on them and are worn for work. If your club requires you to wear a certain type of pants, dress/work shoes as part of a uniform, they usually are tax-deductible. These types of clothing obviously can be worn during non-working hours

THE BEST AT WHAT THEY DO

Metsker earns Tradition Award

By MARK LESLIE

MARYSVILLE, Ohio — Stanley Metsker, who was instrumental in pushing the Golf Course Superintendents Association of America (GCSAA) to accept certification, has been chosen for the Scotts Tradition of Excellence Award.

Metsker, 59, of the Country Club of Colorado in Colorado Springs, will be presented the Excellence Award during the PGA Senior Tour's Tradition tournament at Desert Mountain in Scottsdale, Ariz.

Although Metsker feels his crowning achievement was pushing certification first through the Rocky Mountain Golf Course Superintendents Association (RMGCSA), then through GCSAA, his

Ted Hunker

Hunker tops in TPC Network

By PETER BLAIS

ORLANDO, Fla. — Outstanding tournament conditions, Audubon membership and a happy membership combined to earn superintendent Ted Hunker of the Tournament Players Club at River Highlands in Hartford, Conn., the TPC's designation as its top operation of the year.

Hunker received the award at the annual gathering of TPC superintendents held here during the International Conference and Show.

"The winning operation had such a terrific year it was a very clear choice," said Cal Roth, director of maintenance for PGA Tour Golf Properties. "The head superintendent was very deserving of this award." That superintendent was Hunker.
