**'Penn Pals' On Parade:
Penncross, PennLinks
and PennTrio**

Penncross No. 14, Coeur D'Alene Resort, Coeur D'Alene, ID

Tour the Islands with the 'Penn Pals'

Island putting greens are indeed a beautiful, yet intimidating, sight to behold with some very unique shapes and features. They're also meant to challenge golfers. Once a player has carried the water hazard and landed on the green, he should be rewarded for his efforts. That's why, in most cases, the putting surface is one of the 'Penn Pals'... icing on the cake, so to speak.

We haven't seen the last of island greens. Now that one floats, what's next? Whatever the configuration, your Tee-2-Green distributor has the ideal creeping bentgrass for each application: Penncross... the world standard for putting greens since 1955. Penneagle... the salt tolerant grass for greens and fairways, plus PennLinks, the new choice for greens around the world.

And now, the exciting next generation of low mowing creeping bentgrasses... PENN A-1, PENN A-2, PENN A-4, PENN G-1, PENN G-2 and PENN G-6 will add a new dimension to green performance. So, even when a player's short irons are erratic, and his putting's unpredictable, he can always count on the quality and consistency of 'Penn Pals' greens as he tours the islands.

And Wash-Off Tests Show It, T Sticks And Stays Like T

They say seeing is believing, and here's enough seeing to make anyone a believer. Because high magnification scanning electron microscopy of treated turf samples shows it. And so do Plexiglas® wash-off studies — studies that have been shown to correlate directly to real-world performance. New Daconil Weather Stik™ fungicide sticks and stays like the competition can't.

So when other fungicides might wash away, you can continue to count on Daconil Weather Stik for control of major turf diseases on both warm and cool season grasses. That includes brown patch, leaf spot, melting out, dollar spot, anthracnose, rust, red thread, and snow mold. Plus control of most ornamentals plant diseases and algal scum, too.

le

ed Rainfall/Irrigation

After Heavy Simulated Rainfall/Irrigation

ed Rainfall/Irrigation

After Heavy Simulated Rainfall/Irrigation

Too. New Daconil Weather Stik The Competition Can't.

In addition, Daconil Weather Stik can be tank-mixed with a wide range of turf and ornamentals fungicides (consult label), so you can also count on it for broad-spectrum support of your systemics, as well as disease resistance management. Remember, there's never been a documented case of disease resistance to a Daconil brand fungicide in over 25 years.

And Daconil Weather Stik is more concentrated than prior formulations, so you'll have fewer jugs to get rid of, too. Which simply says from better protection to easier disposal, Daconil Weather Stik is the right flowable choice for you.

**Daconil Ultrex
Chlorothalonil Fungicide**

45 sec

**Dry Generic
Chlorothalonil Fungicide**

45 sec

Daconil Ultrex goes into suspension in less than a minute and stays in suspension even after six hours for consistent coverage from start to finish.

Prefer A Dry Fungicide? Get The One That Gives You Fast, Thorough Mixing And Easier Disposal, Too.

Weather Stik™ Technology™
Sticks and Stays Between Sprays. Guaranteed. Daconil Ultrex®

fungicide. The breakthrough dry alternative that goes into suspension faster and stays in suspension to give you consistent spraying from start to finish with less settling out and fewer problems with clogged nozzles. Because of that same breakthrough technology, Daconil Ultrex pours completely out of the bag, so you eliminate all need for rinsing.

Of course, because bags are easier to get rid of than plastic jugs, and you have fewer of them, disposal is that much easier. Now add the sticking and staying power of our Weather Stik® formulation for exceptional broad-spectrum control of some 70 diseases that attack turf, ornamentals, and trees, and it all adds up to another great choice for you. NOT EVERYONE ON A GOLF COURSE WANTS LONG DRIVES AND LOW SCORES.

Sentinel TURF FUNGICIDE

Golfers worry about breaking par. You'd rather break the stranglehold turf diseases can put on your fairways, tees and greens. Sentinel® fungicide can help. Sentinel offers the longest control and best performance on brown patch, dollar spot, summer patch and 11 other turf diseases—at the lowest rates. Sentinel controls the toughest

diseases 20-35%

longer than

other systemic fungicides. And it won't quit working at critical times, either. Like, say, just before tournament weekend. What's more, Sentinel offers the protection you need at far lower rates than competitive products—anywhere from nine to 100 times less active ingredient. That minimizes worker exposure and lessens the environmental load. When it comes to performance, Sentinel has proven itself on 12 different varieties of turfgrass.

Best Trimec Technology for clover and chickweed

Trimec® Southern Broadleaf Herbicide is *the* Trimec technology for sensitive southern grasses. Trimec Southern controls tough broadleaf weeds, including clover, without repeated applications. The best Trimec clover control (and excellent on chickweed too), Trimec Southern is EPA registered for use in cool-season bluegrass and fescues, as well as bermudagrass, bentgrass, zoysiagrass, centipedegrass and St. Augustinegrass.

TRIMEC® is a registered trademark of PBI/Gordon Corporation.

CIRCLE #195

For those "special" weed control situations . . .

Super Trimec® Broadleaf Herbicide is a low-volatile ester Trimec complex for special weed control situations such as cool weather spraying in spring and fall, as well as for control of hardened off, waxy or hairy-leaved weed species in cool season turfgrass. Controls weeds that resist other herbicide treatments, including clover. Super Trimec has no equal in terms of rapid and thorough absorption. Perfect for spot spraying emerged summer weeds.

TRIMEC® is a registered trademark of PBI/Gordon Corporation.

CIRCLE #196

Get the one that gets them all - grass and broadleaf weeds in turf!

Trimec® Plus Post-Emergent Grass & Broadleaf Herbicide is a Trimec complex which includes MSMA in a stable, uniform suspension. Trimec Plus provides outstanding control of annual grasses and nutsedge as well as broadleaf weeds in turf. And it really smokes clover! In addition to controlling crabgrass, nutsedge, goosegrass, dallisgrass and sandbur, Trimec Plus controls all the broadleaf weeds (and more) normally controlled with Trimec.

TRIMEC® is a registered trademark of PBI/Gordon Corporation.

CIRCLE #197

Weed control for some of the most valuable turf in the world!

Trimec® Bentgrass Broadleaf Herbicide is the product of choice for the most valuable turf at many of the most important golf courses in the world. Provides superior broadleaf weed control in bentgrass and other 2,4-D "sensitive" grasses. Best broadleaf weed control option for bentgrass greens, tees, fairways and aprons.

TRIMEC® is a registered trademark of PBI/Gordon Corporation.

WE LISTEN IN ANY LANGUAGE

JOHN DEERE

It pays to listen to your business partners. We know, because that's what we've been doing since 1986—John Deere's first year in the commercial golf and turf care business. By listening, and responding, to golf course superintendents from all over the world, we now have full-line equipment systems that work as well in Chicago, Charlotte, and Calgary

SPOKEN HERE

as they do in Mannheim, Malaysia, and Montreal. Systems designed around world-wide concerns like noise reduction, safety, durability, service access, parts support, and environmental responsibility. Take time to listen to what superintendents are saying about us. Then, call 800/537-8233 for more information or the location of your nearest distributor.

BECAU

JAPAN

Hiroshi Eto talks:

FAIRWAY MOWERS

"Memberships here at the Tatsuno Classic Golf Club cost about US \$220,000, so the golfers expect good conditions. We use the John Deere 3365 for our fairways because it delivers the best quality of cut. The cutting units never bounce, do a good job following ground contours, and are easy to adjust. Plus, the traction unit is smooth on turns and has the power to handle our hilly terrain. We've tried others. This is the best."

The 3365 delivers a 138-inch cut with five John Deere 30-inch cutting units.

FRANCE

Xavier Moreau talks:

TRIM MOWERS

"We have a lot of areas to trim here at Golf De Limere. Mowing around bunkers alone is a full-time job. The stability and short turning radius of the 2653 allows us to work in places we couldn't before. In fact, because of the 2653, we've been able to take one of our men completely off hand mowing. I also like the fact that the 2653 stays in adjustment. We use it four days a week and only have to check its adjustment once a week."

The new 2653A joins the 2653 to give you a choice of gas or diesel, 26- or 30-inch cutting units for trim mowing.

USE GOOD IDEAS

CANADA

Robbie Hellstrom talks:

GATOR® UTILITY VEHICLES

"The Gator is, hands down, the best lightweight utility vehicle on the market. We just built our first golf course here at Mont Tremblant in Quebec on 500 acres of mountainous terrain. We do things with these machines that would bury anything else. They are our workhorses. We can't afford to have them down. The only time they stop working is when we change the oil. There's nothing else like them."

Durability and high floatation are built into both the Gator 4 x 2 and 6 x 4.

U.S.A.

Dale Miller talks:

LIGHTWEIGHT FAIRWAY MOWER

"John Deere was the first company, without a doubt, to design the kind of lightweight fairway mower we were asking for. One that could handle both cool-season grasses as well as the kind of aggressive bermuda that thrives in the Texas hill country. Here at Barton Creek in Austin, we have John Deere 3235's

mowing our fairways. They do an exceptional job. Plus, the service support we've received from John Deere has been outstanding."

The 3215 and 3235 provide options to make them well-suited for both cool- and warm-season grasses.

AS TRANSLATE

U.S.A.

Michael Lee talks:

WALKING GREENS MOWERS

"Blackwolf Run just hosted the Andersen Consulting World Championship of Golf here in Kohler, Wisconsin this summer and is gearing up for the U.S. Women's Open in 1998. Like we do all year, we used John Deere 220s on our greens. They did an excellent job—even at the low cutting heights we mowed at during the tournament. We've used John Deere walkers here since 1988. We like them because they're reliable, provide a quality cut over our undulating surfaces, and we can get parts for them overnight if we have to."

Exceptional tracking, quality of cut, and durability highlight the John Deere 220 design.

ENGLAND

Stuart Brown talks:

RIDING GREENS MOWERS

"We first used John Deere equipment here at Slaley Hall before we hosted the European Tour qualifying school a couple years ago. The 2243s were our first units—

and they totally changed our greens for the better. The quality of cut improvement was noticeable immediately. Since then, we've added John Deere 3235s for our fairways and 2653s for our tees. In fact, our course conditions have improved so dramatically that we're being considered as the Ryder Cup site in the year 2001."

Offset cutting units on the 2243 translate's into less perimeter compaction on cuts.

WELL

MALAYSIA

Andrew Purchase talks:

BUNKER RAKES

"It's not unusual for us to get 5 inches of rain here at the Tanjong Puteri Golf Resort in a couple of hours. With many steep-faced bunkers, that means a lot of washouts to fix. Our John Deere 1200 with front blade does an excellent job there because of its power and tight turning circle. Our 2653 Utility Mower is also a real help because of its soft footprint and ability to work well on steep slopes. Many times, it's so wet that the 2653 is the only mower we can use on the entire course."

New 1200A delivers more power, less noise, and easier operation than the original 1200.

GERMANY

Bruno Shildecker talks:

ENVIRONMENTALLY FRIENDLY

"We built Golf Club Tuniberg on top of the aquifer that supplies water to three surrounding cities. There were, and are, many regulations to follow. After a year of taking measurements, they've found that the water quality has actually improved since the golf course was built versus what it was when the land was farmed before. A fleet of diesel John Deere equipment with biodegradable oil—developed by John Deere—has helped us maintain the course in an environmentally responsible method."

IRELAND

Tom Prendergast talks:

PARTS SUPPORT

"We first started using John Deere equipment here at Killarney when we purchased 22 Greens Mowers before we hosted the Irish Open in 1991 and 1992. One of the big considerations for us was parts support. With a major tournament there is no time to wait. I can easily say that anytime a John Deere machine has gone down since then we've had it up and running again in 24 hours—which is marvelous. Good service is crucial to a good product.

And that's why our John Deere equipment fleet continues to grow."

Nick Faldo won both the 1991 and 1992 Irish Opens held at the Killarney Golf & Fishing Club.

Twenty-two worldwide depots help John Deere deliver the best parts-support system in the industry wherever you are.

NOTHING RUNS LIKE A DEERE

Now, the most important pin on isn't the one with the flag.

Imagine switching from 11-blade reels for greens to 7-blade reels for tees in about 30 seconds. Now imagine doing it without tools. Jacobsen's new Greens King™ V, with its patented FlashAttach™ system, lets you do just that. You can also switch to verticut reels, spikers or even Jacobsen's own QuickRoll™

greens rolling system—just as quickly. Simply put, the FlashAttach system saves time while increasing productivity. And it's just one of the many innovative improvements you'll find on the Greens King V. Improvements that add a new level of operator comfort, plus easier operation and maintenance. Ask your

ORNAMEC® 170 Grass Herbicide KEEPS ORNAMENTAL BEDS CLEAN WITH LESS LABOR

ORNAMEC 170 Grass Herbicide removes EMERGED unwanted grasses from plantings of shrubs, groundcovers and flowers, including wildflower plantings. Ornamec 170 is effective against nearly all major grass species, including crabgrass, barnyardgrass, goosegrass, foxtails, sand-bur, panicums, bermudagrass, and torpedograss. Of over 600 species and varieties of shrubs, trees, flowers and groundcovers listed on the label, more than 400 may be treated "over-the-top" without risk of plant injury. Unlike other sprayable grass control products, Ornamec 170 requires no surfactant. — PBI/GORDON

ORNAMEC® is a registered trademark of PBI/Gordon Corporation.

CIRCLE #190

EXHALT® 800 Tank-Mix Encapsulator LENGTHENS LIFESPAN OF CONTACT FUNGICIDES

Exhalt 800 is a unique sticker-extender which, added to pesticide spray solutions, attaches to the microscopic particles of pesticide and forms a porous, flexible fabric that encapsulates the pesticide and holds it on the turf or ornamental leaves. Elastic, it flexes and remains intact as the plant grows.

Reducing pesticide losses due to rain, wind and evaporation, Exhalt 800 enables the applicator to spray even when there is a threat of rain. Compatible for tankmixing with most commercially used wettable powders, flowables and soluble powders. — PBI/GORDON

EXHALT® is a registered trademark of PBI/Gordon Corporation.

CIRCLE #191

DYCLOMEC® Landscaping Herbicide STOPS WEEDS AND GRASSES ALL SEASON LONG

Dyclomec 4G Landscaping Herbicide is a granular preemergent which forms an herbicidal barrier in the top 2 to 3 inches of soil for season-long control of annual and perennial broadleaf weeds and grasses. It is labeled for use in and around deep-rooted, woody perennials to eliminate trimming or mowing, and encroaching grasses, around beds, tree wells, monuments and buildings, and along fences, guardrails and walls. Dyclomec's active ingredient, dichlobenil, does not move significantly in the soil and is not taken up by trees or other plants as it acts by stopping growth at the point of contact. — PBI/GORDON

DYCLOMEC® is a registered trademark of PBI/Gordon Corporation.

CIRCLE #192

ALGAEMEC™ Turf Algaecide CONTROLS ENERGY-ROBBING, UNSIGHTLY ALGAL GROWTH

New Algaemec Turf Algaecide from PBI/Gordon Corporation can be applied as a broadcast or spot treatment with all types of spray equipment for the control of algal scums and the odors caused by algae and bacteria. All turfgrass species, including hybrid bermudagrass, are tolerant to this water soluble formulation of quaternary amines. Used in conjunction with adequate drainage, air movement, proper pH and sufficient fertility, Algaemec can be your answer to problems with algal growth. — PBI/GORDON

ALGAEMEC™ is a trademark of PBI/Gordon Corporation.

CIRCLE #193

TRANSFILM® Anti-Transpirant PREVENTS VAPOR LOSS IN ORNAMENTALS AND TURF

Spray-applied Transfilm creates a clear, glossy film which protects plants from water stress brought on by transplanting, winter desiccation, drought, and temperature extremes.

During transportation and transplanting, ornamental plants and certain species of palletted sod may suffer shock if the transpiration rate exceeds the water uptake of the roots. Transfilm's protective coating slows down the transpiration rate, reducing the water requirement and minimizing plant losses. — PBI/GORDON

TRANSFILM® is a registered trademark of PBI/Gordon Corporation.
