OSHA pushes case for ergonomics

By MARK LESLIE

WASHINGTON, D.C. — Arguing that ergonomics is the solution, not the problem, the Occupational Safety and Health Administration (OSHA) ergonomics coordinator defended the agency's work to define guidelines for the workplace.

"Our Congressional mandate is to prevent injury and illness in the workplace," said Nancy Adams. "The way the debate gets framed, ergonomics is the problem. But it's not. It's an intervention strategy to prevent the injury from happening, by good engineering, good process design, fitting the job to the worker and not the worker to the job. You can't do that as one-size-fits-all."

OSHA's push into the realm of ergonomics is not new. The first ergonomist joined the agency in 1979, and talks with labor, trade associations and professional organizations began in the early 1980s. But the business

N.D. golf on the rebound

By BOB SPIWAK

GRAND FORKS, N.D., — The Red River has receded into its banks after cataclysmic flooding this spring, but golf courses in the Red River Valley are still struggling to get back to normal.

In the Grand Forks area alone, damage estimates are around \$8 billion, and not one golf course is fully operating 18 holes again. Courses are still tallying up the damage with Federal

Emergency Management Administration (FEMA) — not only for facilities but lost revenues in an area where an estimated 80 percent of the population plays golf.

At Lincoln Park, a municipal facility run by the Grand Forks Park District, superintendent Steve Mullally said 60 acres of the 18-hole course will have to be reseeded, and nine of the holes
