

Mobile canopy shields 12 golfers at once

Designed with golf courses in mind, CoverShots driving range canopy system offers true mobility and, in most places, year-round protection from the elements. A 937-square-foot coverage area provides ample practice room for up to 12 golfers while shielding them from the hot sun, aggravating showers, or any other inclement weather condition.

Large 90-degree pivoting wheels and strong 110V motors located at each end of the structure assist in positioning. The motors are operated via a single, tower-mounted control box, allowing personnel to merely walk alongside CoverShots for repositioning. Better still, CoverShots' heavy-duty towing assembly allows it to be used anywhere on a course — not just the range.

Fully assembled, the standard CoverShots system is 15 feet tall, 62.5 feet long (41.5- and 83.5-foot models also available), provides 12 feet of canopy clearance and has a canopy width of 15 feet. Options include back drapes and ceiling fans; other soon-to-be available options include misters, lights, heaters and sound systems. CoverShots is also backed by a one-year limited warranty/five-year limited canopy warranty and supported by a toll-free service line with 24-hour response.

For more details, call CoverShots LLC, toll-free at (888) 881-2433.

CIRCLE #305

Ransomes goes 26" & 30" with its T-Plex 185

The Ransomes T-Plex 185 D triplex mower is now available in two models for a choice of cutting unit sizes with 26- or 30-inch widths.

The T-Plex 185 D's three fully floating cutting units closely follow ground contours for a quality cut and smooth finish. Available in seven- or 11-blade configurations, the 26-inch units are interchangeable with other Ransomes mowers, including the 305 and 405 fairway models. A five-blade fixed-head cutting unit is also available for general-purpose mowing.

Reel to bedknife adjustments can be made by hand, thus reducing down time for maintenance. Total cutting width is either 71 inches (26-inch head model) or 84 inches (30-inch head model). The cutting units fold within the width of the front wheels for transport and storage.

Constant three-wheel hydrostatic drive, combined with a variable weight transfer system, help deliver superior traction on a variety of terrain. Conveniently located hand controls operate the raising and lowering of cutting units, while the transmission is controlled by a single foot pedal. Large 20-by-10-by-8-inch flotation tires help reduce ground pressure.

For more information, contact Ransomes America at (800) 228-4444.
