

Kerins eco-friendly

Continued from previous page

O'Shanter or elsewhere.

With his wife Paula ("my right-hand person") at his side, Kerins has involved two students in Pennsylvania State University's Master Gardener Program, Boy Scouts and schoolchildren in the golf course property.

An Eagle Scout himself, Kerins approached area Scout Troop 16, and enlisted the Scouts to monitor bird boxes at Tam O'Shanter. The next year a young man pursued the monitoring as his Eagle Scout project and organized the Troop to build, place and maintain bird boxes.

"He's done it for a year now," Kerins reported. "This year we will have the Scouts work in hollows, make small brush piles for animals, and increase wildlife habitat.

"I was in Boy Scouts and other people gave me opportunities while I was growing up. I thought I could return the favor, but I just enjoy helping other people, too."

Two women are doing Master Gardener projects working on butterfly habitat at Tam O'Shanter. They are committed to spend 100 hours apiece at the course this year, and 50 hours a year afterwards.

And Kerins intends to build a trail for Scouts, schoolchildren and others who want to learn more about butterflies and nature in general.

"One of my main goals is to help others, but also to set an example," Kerins said. "I give a lot of talks to superintendent groups to promote the Audubon program. I'd like them to think a little differently about their cultural practices and what they put on their greens."

Education of the masses is being accomplished in another way at Tam O'Shanter as well.

At each tee, a sign emblazoned with the Audubon Cooperative Sanctuary System symbol informs golfers about one of the projects on the course, or the history of the land, or the facility's recycling program.

On the 12th hole, the nearby maintenance shop has been well landscaped. The 1st-tee sign discusses Tam O'Shanter management's concern for the environment. Another talks about the irrigation system which uses less water but achieves uniform coverage.

Kerins sees "a definite swing toward more environmental awareness," he said. "I also see a lot of companies coming out with products that are less toxic."

Although he didn't attend college, Kerins has attained certified golf course superintendent status. "I have taken many, many short courses," he explained. "And growing up on a golf course, you naturally learn a lot."

Trained as an elementary school teacher, Paula's forte at Tam O'Shanter is organization and the business end of the operation. She is also participating in the butterfly garden.

Will their three children (Colleen, 9; Christen, 8; Joseph, 3) follow in the footsteps of their parents and grandparents at Tam O'Shanter?

"They are very involved and out there on the course every day," Kerins said. "It [future] will be up to the kids. We're grooming them to, first, get their education, and then sit back and decide what they want to do."

Whether they work in golf or not, the odds are that they will inherit their father's "feel for the environment."

Florida GCSA honors Grigg

NORTH NAPLES, Fla. — Gary T. Grigg, superintendent at Royal Poinciana Golf Club here and president of the Golf Course Superintendents Association of America in 1995-96, has been presented the Florida Golf Course Superintendents Association's (FGCSA) Distinguished Service Award for 1997.

Grigg, 56, accepted the award at Naples' Bay Colony Club during a general meeting of the Everglades Golf Course Superintendents Association

(EGCSA). In presenting it, Dale Kuehner, past president of FGCSA, cited Griggs' "outstanding achievements as a golf course superintendent" and as "one who has given his time unselfishly in promoting golf course management." He praised Grigg for his efforts encouraging the unification and further professionalism of all Florida superintendents.

Grigg is a member of the British and International Golf Greenkeepers Association, and has been certified by that organi-

zation as a Master Greenkeeper, one of only 14 greenkeepers in the world to be accorded such certification. He is also a certified golf course superintendent.

Grigg came to southwest Florida in 1992 to oversee construction of Naples National Golf Club. He joined Royal Poinciana in 1995 to oversee a \$7 million upgrade of the private club's two 18-hole courses.

Gary Grigg

What other mowers dream of becoming.

Nestled in their sheds at night, ordinary mowers dream of only one thing: growing up to be a Kubota F-60 Series. And it's easy to see why.

The Kubota F-60 Series features our exclusive Auto Assist 4WD with Dual-Acting Overrunning clutch. It automatically transfers power to all four wheels when the going gets tough. Or, you can manually engage 4WD on the go. Either way, it gives you unequalled traction and maneuverability without tearing up valuable turf.

The durable, independent hydraulic PTO clutch lets you engage and disengage PTO driven implements on the move. A real time-saver in tight situations.

Available with 60" or 70" side discharge mower or 60" rear discharge mower.

Visibility and maneuverability will increase your productivity.

Kubota's advanced E-TVCS diesel engines are designed to deliver maximum power with minimum vibration and noise. Plus, these super-efficient powerplants go a long way in cutting fuel costs and emissions.

Available in 22, 25 and 30 horsepower 4WD models, the Kubota F-60 Series also comes in a 25 horsepower 2WD model.

So if you're looking for a front-end mower that handles like a dream, see your authorized Kubota dealer today.
