Standard unveils new Litter Caddie, head trimmer

Standard Golf has unveiled its new stainless steel Litter Caddie and the Irrigation Head Trimmer. Standard's line of Litter Caddies is designed to help keep trash off the course and simplify cleanup. The mesh design promotes air circulation and reduces odor. Constructed of stainless steel, the newest Litter Caddie is ideal for seaside and humid areas.

The new Irrigation Head Trimmer is designed to remove overgrown grass from around irrigation heads, quick-coupler valves or yardage markers. The clean edge left after cutting eliminates roots for long-lasting grass control. The cutting band can be adjusted one time to precisely fit a course's needs. For more information, contact 319-266-2638.

AgrEvo offers guide to control turfgrass diseases

AgrEvo has announced the availability of the ProStar Tank Mix Solution Central quick reference guide for golf course superintendents. The guide shows superintendents exactly which programs they should tank mix, along with ProStar Fungicide, to control most of the diseases they would encounter.

The ProStar Tank Mix Solution Central quick reference guide is a 22" x 28" four-color poster that lists which products can be tank mixed with ProStar and the diseases each combination can control. For more information, contact 800-843-1702.

LESCO launches LCR2200 and LCR7400

LESCO has introduced its LCR2200 and LCR7400 mowers with two-pedal hydrostatic controls, visible out-front mowing deck for easy operations and independent wheel brakes for tight radius turns. These mowers also feature hydraulic weight transfer valve for increased traction on hillsides and vertical tilting deck for easy removal and installation of blades and maneuvering over curbs.

LCR2200 is equipped with a 22hp diesel engine for economical and reliable operation. Two-wheel-drive with differ-

ential lock provides positive traction. A 60" mowing deck with offset side discharge makes short work of the largest jobs.

LCR7400 comes with a 27hp diesel engine for power in demanding conditions. Automatic 4-wheel-drive for superior traction on all types of terrain and your choice of 60" or 72" offset side discharge cutting tunnel deck, designed to promote maximum air flow for even dispersion of clippings. For more information, contact 800-321-5325.

Regal Crown®

DEEPER ROOTS

MINIMIZE DRY WILT AND WINTER DESICCATION

Golf Course Superintendents, Turf Grass Managers, Sod Grass Growers and Nurserymen are praising the results of Regal Crown.

Regular use of Regal Crown root growth stimulator exhibits phenomenal results. Turfgrass types such as bermuda, bent, zoysia and others develop more roots that are healthier and penetrate deeper. More roots imbedded deeper into the soil means better nutrient and moisture up-take creating thicker, greener tops.

Regal Crown is a blend of hormones specifically designed to promote root growth in turfgrasses and ornamentals. Used regularly, Regal Crown roots can minimize hot weather dry wilt stresses and winter desiccation.

CIRCLE #151

"Course uniformity is extremely important to us and our players. InfilTRx makes the course more uniform. Prior to using InfilTRx, we had to do a lot of additional watering. InfilTRx is better because of faster response to turfgrass management programs on the course. Because we use so much InfilTRx, the recyclable, 260 gallon SpaceKraft® container is a more economical and environmentally sound choice."

PBI announces new label

Barrier Ornamental Landscaping Herbicide is a new label from PBI/Gordon. It's a granular, soil-active product containing 4 percent dichlobenil and was previously marketed by Gordon as Dyclomec 4-G Granular Herbicide. Applied as a pre-emergent or early post-emergent, Barrier controls grasses and broadleaf weeds by preventing seed germination. Contact 800-821-7925.

Textron/Ransomes

Continued from page 59

that the amalgamation is all-consuming. Yet the two companies, Ransomes Textron and Jacobsen Textron will remain as separate entities."

Will we see them specializing in different turf care areas — for example, fine turf care and municipal turf care — in order to expand market exposure?

"I don't think so," said Wilson. "Within both product lines [Jacobsen & Ransomes] there are products which are compatible with both markets. In the U.S., for example, Ransomes has a 700 series of out-front rotaries and Jacobsen has the Turf Cut; both of which are well perceived in both sectors. Similarly in the golf industry each company has some very good products. But I can see us looking at a day when we are developing, for example, a new fairway mower and then there could be commonality of components, maybe even commonality of power units. Yet they could be differentiated in some other way, be it hoods, different reels, different cutter configurations etc. There are many differences in our machines now, yet both lines are well received."

The merger will not affect the traditional Ransomes green or Jacobsen orange. The need to identify the familial nature of the company will be achieved via a soon-to-be-released blue badge of Textron Turf Care and Specialty Products.

Some machinery, the Ransomes Hawk being one example, will be common through all lines with market expansion outside of golf being a primary aim for such products.

In an era when Single Supplier deals are de rigeur, the new mega company of Textron is handily placed, what with the deals previously struck by Ransomes at Pebble Beach, St. Andrews and the Belfry giving a firm footing.
