Milona makes head trimming a breeze

The Milona irrigation head trimmer makes clean cuts around sprinkler heads. Its cutting blade is adjustable to fit head diameters from 6 to 10 1/2 inches. Cutting blades in fixed diameters fitting 7- and 7 1/2-inch heads are also available. The tool features all steel construction and stainless steel cutting blades. For more information contact 800-456-4351.

BAYER STUDY REVEALS NEW OPTION

Studies by Bayer Corporation Garden and Professional Care have revealed a convenient option for applying Merit Insecticide to trees and ornamentals to control insect pests. Applying Merit with the Kioritz soil injector requires a fraction of the water needed for conventional power soil injection treatments. For more information, contact 816-242-2000.

Neptune pumps up 'fertigation' products

Neptune Chemical Pump Co., Inc. now offers a system for applying fertilizers and chemicals to turf via the irrigation system. Called "fertigation," the process is made possible by the combination of Neptune's Series 500 "dialPUMPs" and the Eiffel Fertilizer Pump Platform.

Series 500 dialPUMPs are hydraulically actuated diaphragm metering pumps that, when used in combination with common irrigation systems, allow users to precisely adjust the amount of fertilizer ap-

plied per acre, so that the turf receives exactly the correct dosage.

Single-head (simplex) pumps are available with capacities from 2.0 gph to 80 gph. The Eiffel Fertilizer Pump Platform on which the Series 500 dialPUMP sits is a single-piece platform molded from strong, lightweight polyethylene for easy lifting and handling. It integrates the pump controls and wiring for complete portability. For more information, contact 215-699-8701.

Verti-Drain: Acupuncturing greens

Redexim-Charterhouse, manufacturer of the Verti-Drain, has announced the introduction of the Hair Tines. These ultra thin solid tines have a diameter of only 5 millimeters and are mounted on the Verti-Drain arms in three different rows with extremely tight spacing. There is less than 2 cm. of space in between the holes. This is achieved by the unique parallelogram-forced heave on the tines, which is the Verti-Drain patent. A true acupuncturing of the greens is achieved. By allowing this much oxygen into the soil, thatch build-up is diminishing rapidly and a dense ramification network of roots is achieved. Contact your nearest Verti-Drain dealer.

E-Z-GO's 800 ready for action

The welding, fitting and painting have begun on the newest tough-jobs tamer from E-Z-GO. The new Industrial 800 utility vehicle is ready to ship. E-Z-GO developed the Industrial 800 as the latest in a long line of dependable, workaholic utility vehicles. Available in both gasoline and electric models, the 800 offers the features that in-

dustrial users need for close-quarters automotive transportation and hauling.

Optional features include a scuff guard to protect the differential over difficult terrain, a canopy top and weather protection package, a locking glove box, an hour meter and a power dump bed. For more information, contact 706-798-4311.

Dodson

Continued from page 9 consideration natural features and resources, and enhance or restore the pre-existing uniqueness of the land rather than destroy it all and then recreate it in ways that can't be sustained over time?

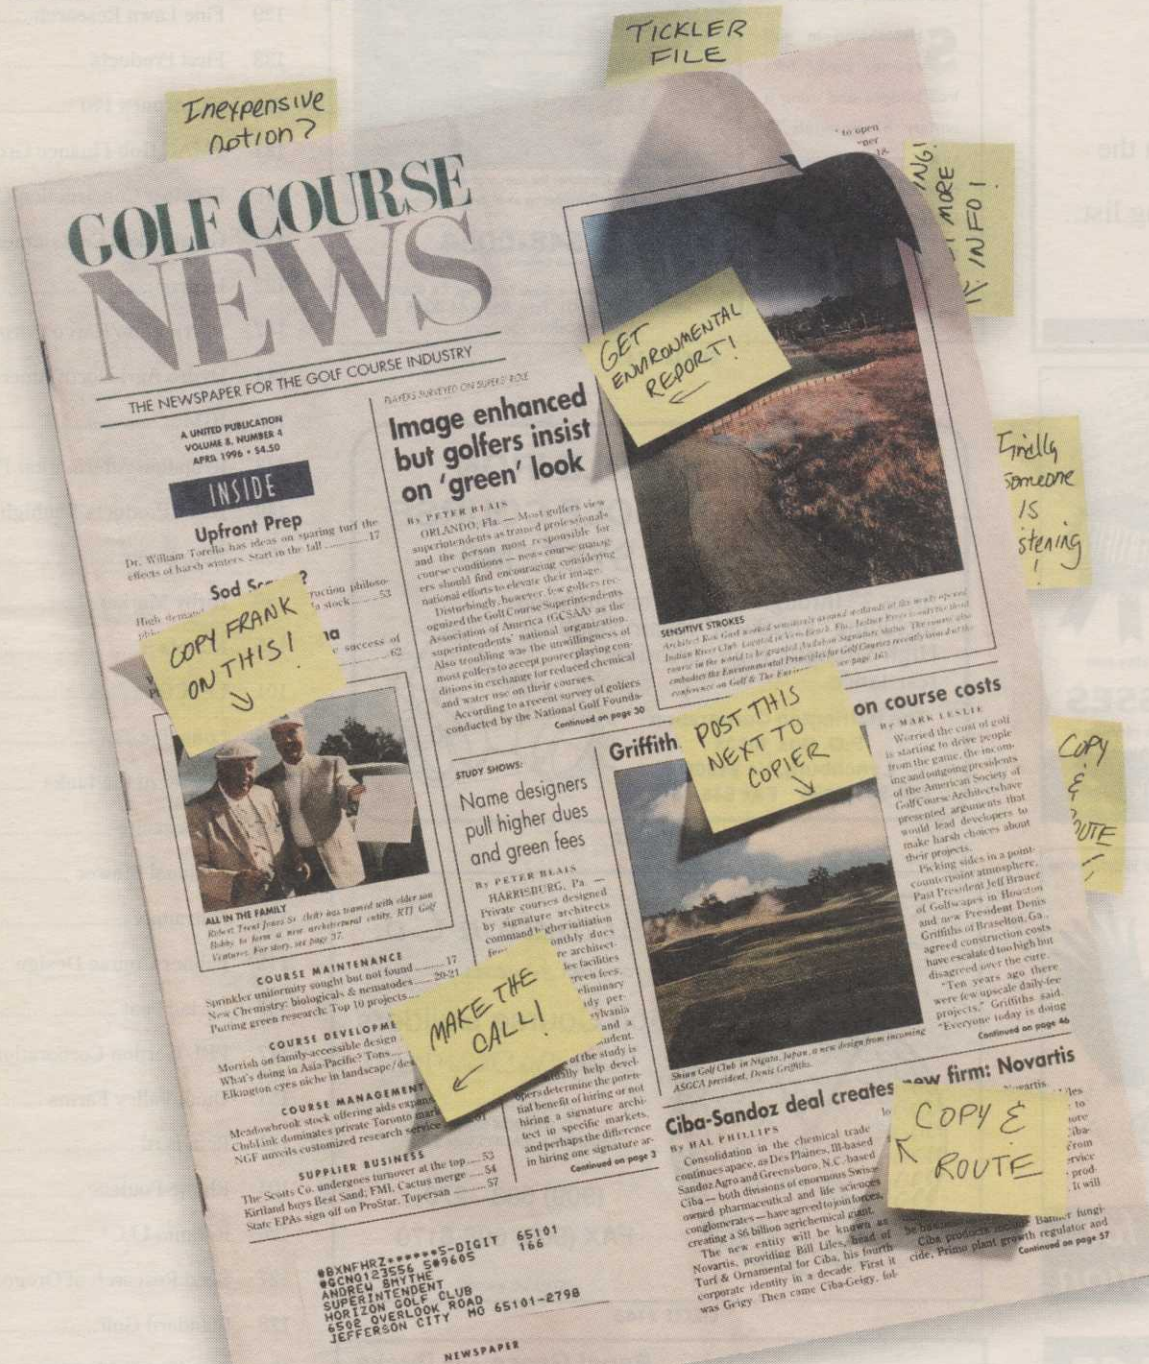

WELL MANAGED

The decisions made regarding a "proper" site and an "appropriate" design will have a

long-term effect on the superintendent who is left behind to manage the course. If poor siting and design decisions are made, subsequent management decisions may become expensive and burdensome. And for those who are dedicated to being environmental stewards of the land, it's a frustrating balancing act.

They will be required to make decisions and take responsibility for pesticide use, assessing

Stick to News.

'Decisions regarding golf course construction should always ultimately be founded on the history and tradition of golf.'

the subsequent impact on water quality throughout the community, and conserving natural resources, all the while keeping fairways green and members happy.

Decisions regarding golf course construction should always ultimately be founded on the history and tradition of golf — a game with its roots in nature. Nature rarely presents us with what has become the "television-studio" approach to golf course development and design.

Rather, we should develop land and design golf courses that provide the opportunity to showcase environmental stewardship. Likewise, we should manage our golf courses as exemplars of environmental stewardship. Anything less will be a disservice to our fellow human beings, the golf course industry, and the future of our planet.
