

## Moving on

Continued from previous page

as superintendent. Prior to his stint at Shalimar, Burchfield worked at, and served as a member of the construction staff at The Raven Golf Club in Phoenix.

...

HILLSBOROUGH, N.J. — **Trent J. Inman** has joined the new Royce Brook Golf Club as the head superintendent. Inman

will supervise the overall maintenance and conditioning programs for the golf courses, including overseeing the grow-in phase of the fescue on the West Course and native wild grasses on the East Course, as they continue to mature following their opening last May.

A Purdue University graduate, Inman was the assistant golf course and property manager at Caves Valley Golf Club

in Owings, Md.

...

BLOUNT COUNTY, Ala. — **Mark Langner** has been hired by Limestone Springs, Ltd., to be superintendent at the community's new 18-hole golf course designed by former U.S. Open champion Jerry Pate.

Langner holds a degree in agronomy, with specialization in turfgrass management, from Mississippi State University.

Prior to accepting the position at Limestone Springs, he was head superintendent for the east course at Birmingham Country Club.

...

CONWAY, S.C.—Western Golf Properties, Inc., has promoted **Scott Scamehorn** to superintendent for Wild Wing Plantation here.

For the past two years, Scamehorn has been the super-

intendent at Lost Key Golf Club in Perdido Key, Fla. Prior to that, he was the assistant superintendent at Falcon's Fire Golf Club in Kissimmee, Fla. Both clubs are managed by Western Golf Properties, Inc.

He is a golf course operations graduate from Lake City College in Florida.

...

LA QUINTA, Calif. — **Marc Sundeen**, Rancho La Quinta's assistant golf course superintendent for 18 months, has assumed the head post for the community's Turf Maintenance Department.

A graduate of Penn State's Turfgrass Management Program, Sundeen has nearly 10 years of experience, including managerial roles at Pebble Beach and The Vintage Club. He also holds degrees in psychology and art history from the University of Minnesota.

## Cook offering short courses

NEW BRUNSWICK, N.J. — Cook College's Office of Continuing Professional Education is offering short courses to help people enhance their knowledge and business opportunities in the green industry.

The "Advanced Topics in Professional Grounds Maintenance" series will offer "Turf Diseases," scheduled for Feb. 10, and "Managing Turf and Landscape Weeds," scheduled for March 17-18. Both classes will meet from 9 a.m. to 3:30 p.m. on the Cook/Douglass Campus here.

The "Advanced Topics in Professional Groups Maintenance: Turf Diseases" short course will help refine diagnostic skills. This one-day program explores disease management issues in landscape turf, while introducing advanced concepts in turfgrass pathology. Topics will include troubleshooting problems in landscape turf; the impact of the turf microclimate on disease; fungal classification and identification; fungicide selection and use; biological control issues; and turf diseases that may have been missed.

The "Advanced Topics in Professional Grounds Maintenance: Managing Turf and Landscape Weeds" short course will help landscape professionals learn to manage common and difficult weeds in the tri-state area. Many costly and unsightly weed problems can be avoided — or at least minimized — with a little planning and knowledge. Participants will develop their own weed-control program, which will address specific weed problems they routinely encounter.

For more information or to register, please call the Office of Continuing Professional Education at 732-932-9271.

Now you can control grubs preventatively or curatively. With a single application. Only with new MACH 2™ Turf Insecticide.

MACH 2 is a powerful killer with a new chemistry that accelerates the molting process of target insects.

Just hours after ingesting MACH 2, the insect stops feeding. Then it dies beneath the surface in 2 to 3 weeks. It's that simple.

With MACH 2™ Turf Insecticide, you'll kill target enemy insects all season long. Grubs. Cutworms. Armyworms. Sod webworms. Plus, odorless MACH 2™ is easy to apply.

You don't even have to water it in immediately.

So don't let grubs control your grounds, or your schedule. Depend on MACH 2™ Turf Insecticide.

It's all you need to prevent or cure.

For more information or for the distributor nearest you, call 1-888-764-6432 and visit our website at [www.mach-2.com](http://www.mach-2.com).
