

Penn A-4 creeping bentgrass succeeds at Cypress Lakes

"We just couldn't keep grass on this green before. I'd worry about keeping the players happy, but now I sleep better at night with Penn A-4 bentgrass."

"We planted Penn A-4 in the fall of 1994, '95 and '96. We faced very poor grow-in conditions, including two hurricanes, and were still able to open for play eight weeks after seeding all three years. Willie and I have a very limited budget to work with, and have heard the hype about increased expense and labor involved with managing newer bent varieties. With Penn A-4, we've found this simply isn't true. The exceptional putting surface we have obtained here at Cypress Lakes more than outweighs any addi-

tional effort on our part. It's a relief to know we have superior heat tolerance working for us in the south, and on this green in particular where nothing seemed to grow next to our namesake cypress lake. We maintain a 0.125" cut throughout the summer, which makes for a truly consistent year-round putting surface with no adverse affect on plant health. We believe that Penn A-4 will continue to perform for our 18 greens here at Cypress Lakes, and we thank the team at Tee-2-Green for introducing it to us."

YOUR GREENS MAY BE PERFECT.

JUST ASK YOUR PLAYERS

Many a good score has been ruined by a poorly maintained bunker. All players want bunkers that are uniformly firm, consistently smooth and professional in their play. Our bunker rakes and their innovative implements will give you and your golfers the most playable bunkers of all.

Our New Tournament Rake.

PATENT PENDING

BUT HOW ARE YOUR BUNKERS?

Introducing The New Tournament Rake.

Our new-design finish implement delivers the perfect sand conditions for the best bunker play. So revolutionary it is being patented. Constructed of high grade, rust-proof stainless steel, its new and flexible raking teeth and specially designed blades create the ideal firmness and finish for bunker sand. And it operates silently. Only from Smithco.

SUPER STAR
Bunker Rake

Our Speed Boss Invention. The patented, bunker finish speed control that prevents sand throw-out and greatly reduces the time and labor required for edging. You adjust and pre-set the finish speed and the system takes over automatically when the raking implement is lowered, then restores the normal ground speed when it is raised. So, you're the boss. Only from Smithco.

SUPREME
Bunker Rake

Many Other New And Exclusive Features.

Our liquid-cooled gasoline engine ■ hydraulic power steering ■ extra-high ground clearance for easy bunker entry and exit ■ and our patented, silent, electric-powered "E" model ■ Only from Smithco.

Our extensive line of bunker rakes and implements, with their many new and innovative features, offers by far the widest choice of models and pricing, to meet every need and budget. Call your Smithco distributor today for a demo. Seeing is believing.

HERE. THERE. EVERYWHERE.

HOW'S THAT FOR APPLICATION GUIDELINES?

On greens. On tees. On fairways, roughs, flower beds, transplants — even in your divot mix. Milorganite delivers outstanding results for a uniform playing surface. No other fertilizer is easier on plants or simpler to use. Milorganite's slow release, organic nutrients won't burn or cause a flush of growth. Plus, it's high in micronutrients such as iron to promote dense, vigorous turf. And Milorganite resists leaching, for a sound environmental profile. So call your distributor today, or call Milorganite's turf professionals direct at **1-800-304-6204**. It's easy.

PAIR FOR THE COURSE

TURF BIOSTIMULANTS

Don't Play Around With What They Play On.

Increased root mass and root depth. Optimal plant utilization. Health and vigor. Focus and Launch pair up to deliver the kind of results that get your golf course noticed by top players ... again and again.

Launch new sod or seed, and you'll see results within days.

Focus on distressed areas, and you'll be amazed at how fast they recover.

Test results prove Focus™ and Launch™ are on course as the premium biostimulants

Turf grasses become more vigorous. Your course becomes more wealthy. And everyone will know you're wise.

FOCUS has been applied in cooperator studies across the country.

Soil profile cores are taken periodically to compare root lengths.

Washed root samples are lab-evaluated for increased root mass.

Get out of the rough and onto the green with Focus™ and Launch™.
