

Penn A-4 creeping bentgrass succeeds at Cypress Lakes

"We just couldn't keep grass on this green before. I'd worry about keeping the players happy, but now I sleep better at night with Penn A-4 bentgrass."

"We planted Penn A-4 in the fall of 1994, '95 and '96. We faced very poor grow-in conditions, including two hurricanes, and were still able to open for play eight weeks after seeding all three years. Willie and I have a very limited budget to work with, and have heard the hype about increased expense and labor involved with managing newer bent varieties. With Penn A-4, we've found this simply isn't true. The exceptional putting surface we have obtained here at Cypress Lakes more than outweighs any addi-

tional effort on our part. It's a relief to know we have superior heat tolerance working for us in the south, and on this green in particular where nothing seemed to grow next to our namesake cypress lake. We maintain a 0.125" cut throughout the summer, which makes for a truly consistent year-round putting surface with no adverse affect on plant health. We believe that Penn A-4 will continue to perform for our 18 greens here at Cypress Lakes, and we thank the team at Tee-2-Green for introducing it to us."

Willie McGeachy, Superintendent

Subdue MAXX is the most effective Pythium control on the market. Its long residual of up to 21 days and low cost per 1,000 sq. ft. make Subdue MAXX the best value for your Pythium control dollar.

Subdue MAXX also controls Pythium Damping-Off and Yellow Tuft (Downy Mildew). And by using it as a tank mix partner with chlorothalonil, you can control both Pythium and Brown Patch during stressful summer Bentgrass decline periods.

Plus, the revolutionary water-based microemulsion formulation of Subdue MAXX means less chemical on your course, and less to store and handle.

For more information on Subdue MAXX and the rest of the Novartis line of turf products, call 800-395-TURF for the name of your Novartis Sales Representative. **Or you can visit our website at www.cp.us.novartis.com.**

Subdue MAXX is an important part of the Novartis Total Turf Program, the system of leading-edge products to help you protect and maintain your entire course throughout the year.

State-of-the-Art.

HERITAGE®. THERE'S NEVER BEEN ANOTHER FUNGICIDE QUITE LIKE IT—AND NEVER WILL BE.

HERITAGE fungicide masters the art of disease control. With its distinctly different, state-of-the-art chemistry, HERITAGE is unlike any other fungicide.

Not only does it act both preventatively and curatively against turfgrass disease, it also exhibits other important advantages, including:

- **Controls Most Turfgrass Diseases**

Controls most destructive diseases, including Pythium, take-all patch, summer patch, anthracnose, and snow mold.

- **Novel Mode of Action**

Only strobilurin chemistry available that delivers highly effective systemic activity.

- **Reduced Risk Fungicide**

Displays a low-risk toxicological profile for reduced risk to environmental resources.

- **Extended Spray Intervals**

Applied at low use rates with longer spray intervals.

- **Improves Turf Quality**

Enhances the thickness and color of turf without stunting or plant growth regulator effect.

Turf Quality (Index 0 – 10)

State-of-the-art HERITAGE fungicide.
Make it a regular part of your management
program for a turf masterpiece.

**Every season your course
endures the same stresses as
a major tournament course.**

Shouldn't it have the same protection?

Primo® used for Pre-Stress Conditioning helps keep 120 major tournament courses in championship condition.

Pre-Stress Conditioning with Primo helps prepare your course in advance for an entire season of wear and weather. Which is why 120 tournament courses depend on Primo.

Primo helps create denser, healthier turf for a beautiful, better-playing golf course. By using Primo, you'll help protect your course from the extremes of heat, rain, drought, and heavy traffic; improve your disease control program and even speed divot recovery. That's because Pre-Stress Conditioning with Primo actually gives your turf bigger root systems and increased lateral stem development. All of which results in increased food reserves, more efficient water use, and thicker, healthier turf better able to withstand stresses throughout the season.

Your course undergoes the same stress as a leading tournament course, so why not give it the same protection? Use Primo for Pre-Stress Conditioning. To learn more about Primo, call 800-395-TURF for the name of your Novartis Sales Representative. Or visit our website at www.cp.us.novartis.com

PAIR FOR THE COURSE

TURF BIOSTIMULANTS

Don't Play Around With What They Play On.

Increased root mass and root depth. Optimal plant utilization. Health and vigor. Focus and Launch pair up to deliver the kind of results that get your golf course noticed by top players ... again and again.

Launch new sod or seed, and you'll see results within days.

Focus on distressed areas, and you'll be amazed at how fast they recover.

Test results prove Focus™ and Launch™ are on course as the premium biostimulants

Turf grasses become more vigorous. Your course becomes more wealthy. And everyone will know you're wise.

Get out of the rough and onto the green with Focus™ and Launch™.

Call, write, or visit our web site for a distributor nearest you.

Your Focus™ and Launch™ distributor has some more exciting points to make about our products. Call, write, or visit us today:

www.pbigordon.com

or - www.trimec.com

Tel: 1-800-236-5172

Fax: 816-474-0462

FOCUS has been applied in cooperator studies across the country.

Soil profile cores are taken periodically to compare root lengths.

Washed root samples are lab-evaluated for increased root mass.

An Employee-Owned Company

As Dependable As You.

DACONIL® for Dependable, Economical Performance Each and Every Day.

You're on the job each and every day. Why expect less from your fungicide. There's no better fungicide than DACONIL to deliver dependable and economical performance on your tees, greens and fairways. Each and every time you apply DACONIL, it delivers these advantages:

- Multi-site mode of action
- Sticks and stays for maximum protection
- Control of 14 diseases, including dollar spot, leaf spot, melting out, brown patch, anthracnose, rust, and red thread
- Both easy and economical to use
- For application on nine species and nearly 75 varieties of turfgrass
- Three flexible formulations—Ultrax®, Weather Stik®, and Zn

For dependable performance each and every day, it's DACONIL.

CIRCLE #117

ZPP-DAC-009

To Some Lenders This Is A Very Risky Situation.

MANY LENDING INSTITUTIONS CAN'T afford to dedicate the necessary resources to fully understand golf course financing.

First National is one of the largest lenders to golf courses, with substantial experience lending domestically and internationally. No one understands this specialized asset class better than we do.

As a principal lender—not a division or subsidiary—we make our own decisions, we make our own loans and we can usually provide higher valuations and higher loan limits to golf facilities. And we continue to service our loans so our borrowers always deal with the principal lender.

See why your first choice should be First National, for acquisitions, construction, renovation or refinancing loans.
