Penn A-4 at Tiffany Greens

Mark Pierce, Superintendent Tiffany Greens GC Kansas City, MO John Q. Hammons Development

"If a new course hopes to host a major tournament, it'll have to plant one of the great new bents. Penn A-4 is the right choice for Tiffany Greens and our changeable Kansas City climate."

Tiffany Greens was destined to be first class all the way from its perfect location and Robert Trent Jones II design to the choice of Penn A-4 creeping bentgrass for greens.

Now that word is out we have the truest, most consistent greens in the area, golfers flock to this semi-private course. We mowed the greens 10 days after seeding, and took the height down to 0.125" in a matter of weeks. Penn A-4 established quickly, and maintains deep roots year-round. Since we opened the course in April 1999, green speed is a consistent 9.5 with no stress during high heat index days.

Penn A-4 doesn't require any extraordinary maintenance procedures. Anyone who wants smooth, fast greens has to do the same amount of maintenance. I verticut and topdress twice a month and spoon-feed fertilizer. My uncle Junior was a superintendent, so I grew up on a golf course. I worked for him 8 years, and have been a superintendent myself for another 19 years. He taught me that greens were like the motor of a car—the most important part—and when the motor was good the car was good. The motor's great here at Tiffany Greens. To host a PGA Senior Tour event in our first year is an honor, a privilege, and a compliment.

MICAL SAN STATE UNIVERSITY

State-of-the-Art.

HERITAGE[®]. THERE'S NEVER BEEN ANOTHER FUNGICIDE QUITE LIKE IT—AND NEVER WILL BE.

ERITAGE fungicide masters the art of disease control. With its distinctly different, state-of-the-art chemistry, HERITAGE is unlike any other fungicide. Not only does it act both preventatively and curatively against turfgrass disease, it also exhibits other important advantages, including:

- Controls Most Turfgrass Diseases
 Controls most destructive diseases, including
 Pythium, brown patch, take-all patch, summer
 patch, anthracnose, and snow mold.
- Novel Mode of Action

Only strobilurin chemistry available that delivers highly effective systemic activity. Reduced Risk Fungicide

Displays a low-risk toxicological profile for reduced risk to environmental resources.

Extended Spray Intervals

Applied at low use rates with longer spray intervals.

• Improves Turf Quality

Enhances the thickness and color of turf without stunting or plant growth regulator effect.

Turf Quality (Index 0 – 10)

State-of-the-art HERITAGE fungicide. Make it a regular part of your management program for a turf masterpiece. For more information, contact your authorized Zeneca Agent, or call Zeneca Professional Products Toll Free at 1-888-617-7690. Labels and MSDSs available 24 hours a day, seven days a week via Fax on Demand. Please call 1-800-640-2362. www.zenecaprofprod.com

CHANGING THE COURSE OF DISEASE CONTROL

Always read and follow label directions carefully. HERITAGE® is a registered trademark of a Zeneca Group Company. ©1999. Zeneca Inc. Zeneca Professional Products is a business of Zeneca Ag Products, a business unit of Zeneca Inc. New Compass[™]. A fairway fungicide so advanced it combines the best of contacts and systemics at the lowest rates ever.

Unsurpassed control of Brown Patch and 10 other diseases.

Compass is the best Brown Patch value on the market. Period. It provides the highest efficacy against Brown Patch at the lowest rates ever, as well as excellent control of diseases such as Gray Leaf Spot, Anthracnose, Leaf Spot, and many others.

Tank mix with Banner® MAXX™ for Dollar Spot control and Subdue® MAXX™ for Pythium control.

Compass is an excellent tank-mix partner for Banner MAXX in controlling Dollar Spot and providing additional protection against Anthracnose, Leaf Spot, and Summer Patch. Tank mixing with Subdue MAXX provides exceptional control of Pythium.

Affordable on fairways, yet effective on greens.

Use of Compass is not limited to fairways. With its revolutionary technology, it can be used on greens and tees, as well. Affordably priced, it is the ideal solution for all areas of the course.

Mesostemic power delivers locked-in, rainfast control up to 21 days.

Mesostemic activity, a revolutionary feature unique to Compass, allows it to securely lock into the plant surface. The result: a protective reservoir of fungicide for long-lasting, rainfast disease control.

Lowest rates ever reduce chemical load up to 95%.

Compass delivers the value

of a contact with the power

of a systemic.

Reduced-risk classification means environmentally sound disease control.
