company, American Golf. The

company operates more than

300 private, resort and daily-

fee golf courses and practice

Textron signs deal with American Golf

RACINE, Wis. - Textron centers in the United States and the United Kingdom.

The three-year agreement states that a majority of American Golf's new turf-maintenance equipment purchases will be from Textron Turf Care and Specialty Products.

"American Golf's agreement

vide the highest level of maintenance possible at our courses worldwide," said John Meyer, American Golf's director of fleet management and national accounts.

Bayer awards 1999 scholarships

Kvelland, University of Illinois-

versity; Mark Daniels, Ohio

State University; and Jeffrey

Urguhart, University of Rhode

Island-Providence.

KANSAS CITY, Mo .- The Bayer Corp. Garden & Professional Care (GPC) business group has awarded scholarships to 15 university students pursuing turfrelated degrees at 12 different universities. Students selected for the scholarship have demonstrated superior academic and leadership skills. University professors nominate students who demonstrate promising potential for the turf grass profession.

"Bayer GPC is always looking for ways to raise the bar professionally in the turf and ornamental industry," said Neil Cleveland, turf and ornamental market manager. "These students have demonstrated the drive and the skills to help move us in that direction."

The scholarship recipients are: Ryan Vogler and Matthew Boyce, Penn State University; Eric Hogan, University of Missouri-Columbia; Dave Weston and Mieke Damaske, Cornell University; Eric Watkins, Rutgers University; Kris

Lesco

its, said Foley. "The strategic initiatives that we invested in during 1998 are driving our growth and profitability in 1999," he said.

Lesco looks to continue its expansion strategy this year with the construction of a new plant outside of Richmond, Va. that will produce a completely new controlled-release, homogeneous turf fertilizer utilizing matrix technology. "We bought the worldwide rights last year," said Foley. "The fertilizer features an entirely new process that has not been available anywhere in the world before." The plant is scheduled to go into limited production early this fall and product should be available late this year.

Meanwhile, Foley expects to maintain the current growth levels. "We have been growing at 20 percent for the last five years, and I think we'll continue to grow at those rates," said Foley.

In other Lesco news, the company announced that Breck Denny will replace Ware Grove as vice president and chief financial officer.

Denny worked for investment banking firm J.P. Morgan and Co. for 23 years and most recently served as vice president, finance and treasurer for Ohio-based Medusa Corp

"He has great relationships with the investment community as well as experience in our market," said Foley.

TIRED OF BEING HELD UP **EVERY SPRING?**

Other preemergence herbicides make you wait around after the winter thaw to get your course in shape. But only Dimension® gives you the flexibility to apply in the fall and reseed earlier in the spring.

A fall application for crabgrass control doesn't interfere with spring re-growth or overseeding." And its low water solubility means it will be ready to head off crabgrass come spring.

Dimension doesn't stain, is safe for application around ornamentals or landscape beds and has a low use rate and favorable environmental profile. It's the preferred choice of golf course superintendents."

So, for season long control of crabgrass and over 20 other tough weeds, including Poa annua, apply Dimension this fall.

For more information, call 1-800-987-0467 or visit us at www.dimensionpro.com.

*Do not overseed or reseed with bent grass after application of Dimension for 90 days **1998 GCSAA Plant Protectant and Fertilizer Usage Report. Product effectiveness for preemergence crabgrass control. Always read and follow label directions. Dimension® is a registered trademark of Rohm and Haas Company. @1999 Rohm and Haas T-O-299
