

The heroes of Southern Hills take a Stand on Penn A-1 and A-4 blended.

Number 14,
Southern Hills CC
Tulsa Oklahoma
Perry Maxwell, Architect
Opened 1935

From left to right: John Carothers, Pat Boyer, Aaron Baker, Barry Hargrove, Todd Towery, John Szklinski, Eric Smith, Jeremy Dobson, Chris Wilson, Roy D. Bradshaw.

Superintendent John Szklinski tugs on an 18-month-old root that helps hold this plug together—even when it's held sideways.

“When an unknown vandal destroyed some of our PennLinks greens in 1999, we realized we’d have to re-grass all 18. PennLinks had provided a fine putting surface, but the newer Penn bents were available at the time of reseeding, and the Penn ‘A’ series looked good in our trials. But which one would work best in Tulsa, Oklahoma, capital of the Transition Zone? At the urging of Dr. Joe Duich we had Penn A-1 and Penn A-4 blended for us by Tee-2-Green Corp. and are pleased with the results, but more pleased that our members recognize the difference in density, grain-free smoothness, plus putting speed and consistency. Winter mowing height is 0.135”, which we lower to 0.110”—the same height of cut we’ll use at the U.S. Open—for summer play.

I’m very impressed with the Penn blend’s ability to establish a

strong, dense root system so quickly. We can cut a cup in our soil push-up greens and pull the plug with total confidence of no breakage.

Poa annua is a fact of life in Tulsa, but we’ve had no invasion or encroachment in the two years since we’ve seeded our relatively small greens. With the extreme density of our Penn A-1 / A-4 blend, the use of alternative spikes only, and pre-emergent applications, *Poa annua* doesn’t get a chance to start.

The team of Southern Hills heroes here stand on the belief that our greens will be a fast but fair test for the world’s best golfers during the U.S. Open in June, and remain excellent for member play long after the television cameras are gone. ”

John Szklinski, Superintendent
Southern Hills CC, Tulsa, OK

Penn A-1 and Penn A-4 are two of the Penn Pals™, which include Penncross, Penneagle, PennLinks, Penn A-2, Penn G-1, Penn G-2, Penn G-6, Seaside II, Pennway blend, NuPenn blend, and PennTrio blend.

THE BEST GREENS AREN'T BUILT.
THEY'RE MAINTAINED.

No machine maintains greens better than the John Deere 2500 Tri-Plex Greens Mower. After years of extensive testing feedback from literally thousands of superintendents worldwide, the 2500 has been engineered to give an exceptional quality of cut, the utmost in operator comfort, and the highest level of serviceability. Cut is king on the 2500. The cutting unit

suspension carries the weight of the lift arms and grass catchers on the traction unit instead of the cutting unit. The 2500 also has the lowest psi of any tri-plex greens mower. And all controls are conveniently located at the operator's fingertips. For a better look at the 2500, call your local John Deere distributor or 1-800-537-8233.

NOTHING RUNS LIKE A DEERE®

JOHN DEERE

During overseeding, it won't burn the course. Or you.

Fertilizing during overseeding is a lot like playing with fire. Apply a little too much, and it won't be long before those telltale signs emerge. That's when the real beauty of Milorganite appears. By releasing its nutrients slowly, Milorganite stimulates cool-season grass seedlings without overstimulating warm-season varieties as they go dormant. It's foolproof – protecting both the course and your reputation. For details, visit milorganite.com or call 1-800-287-9645.

18th hole, Bay Hill Club & Lodge

HOW A SIGNATURE HOLE MAINTAINS ITS SIGNATURE STATUS.

What's better than a Jake cut? A Jake cut that combines state-of-the-art technology with ease of operation. They won't settle for anything less at Arnold Palmer's Bay Hill Club & Lodge — home of the Bay Hill Invitational. The new LF-3400/3800 fairway mowers feature the industry's most advanced engineering, including a simplified hydraulic system, electrical components with self-diagnostic capabilities and improved overall ergonomics. With the

input of experienced mechanics and operators, these models are the easiest ever to maintain, own and operate. Now, add in the Jake precision cut, and you've got a formula for productivity and performance no one can beat. After all, when you've got an image to maintain, there's no room for errors.
